INSTANT NEW YORK TIMES BESTSELLER At the one-year anniversary of his death, legendary musician Prince's first wife shares a uniquely intimate, candid, and revelatory look inside the personal and professional life of one of the world's most beloved icons. In The Most Beautiful, a title inspired by the hit song Prince wrote about their legendary love story, Mayte Garcia for the first time shares the deeply personal story of their relationship and offers a singular perspective on the music icon and their world together: from their unconventional meeting backstage at a concert (and the long-distance romance that followed), to their fairy-tale wedding (and their groundbreaking artistic partnership), to the devastating losses that ultimately dissolved their romantic relationship for good. Throughout it all, they shared a bond more intimate than any other in Prince's life. No one else can tell this story or can provide a deeper, more nuanced portrait of Prince—both the famously private man and the pioneering, beloved artist—than Mayte, his partner during some of the most pivotal personal and professional years of his career. The Most Beautiful is a book that will be returned to for decades, as Prince's music lives on with generations to come.

A dazzling, irresistible collection of the ten most groundbreaking and beautiful experiments in scientific history. With the attention to detail of a historian and the storytelling ability of a novelist, New York Times science writer George Johnson celebrates these groundbreaking experiments and re-creates a time when the world seemed filled with mysterious forces and scientists were in awe of light, electricity, and the human body. Here, we see Galileo staring down gravity, Newton breaking apart light, and Pavlov studying his now famous dogs. This is science in its most creative, hands-on form, when ingenuity of the mind is the most useful tool in the lab and the rewards of a well-considered experiment are on exquisite display.
