The volume is dedicated to fields related to design, modeling, fundamentals and application of communication systems. Focusing on wireless technology it covers content based video retrieval, B4G wierless communication systems and their application, data fusion and pattern recognition. It also discusses the influences of coding compression and e-mobility on information and communication technology.

Aquest llibre arreblega una sèrie d ' activitats o pràctiques, agrupades en 16 unitats didàctiques, dirigides als alumnes de la matèria optativa d ' ESO " El Laboratori de Biologia i Geologia " . Encara que la major part de les activitats o pràctiques estan destinades als alumnes del segon cicle de l ' ESO, depenent del criteri del professor, és possible la selecció d ' un extens grup de pràctiques que s ' adapte al nivell dels alumnes del primer cicle. La majoria de les experiències es poden realitzar sense massa complicacions al laboratori de qual-sevol Institut d ' Educació Secundària mínimament equipat. Les activitats de cada unitat estan relacionades entre si i intenten abastar els aspectes fonamentals de les diferents disciplines (Ecologia, Microbiologia, Cristal·lografia...) en aquelles unitats a les que donen títol. La major part de les experiències proposades tenen una estructura fixa: material necessari, procedi-ment i qüestions. Aquestes últimes arrebleguen el resultat i les conclusions de cada pràctica i ser-veixen per aprofundir i ampliar els conceptes bàsics (part teòrica) que apareixen en cada unitat. Amb l ' objecte de despertar la creativitat i de desenvolupar les habilitats dels alumnes per aplicar la investigació a la resolució de problemes, el plantejament de moltes pràctiques fa possible l ' aplicació del mètode científic com a forma de treball al laboratori amb les orientacions oportunes del profes-sor. El laboratori de Biologia i Geologia proporciona als alumnes una concepció dinàmica de la Ciència, i possi-bilita que adquiresquen les estratègies necessàries per explorar la realitat d ' una manera rigorosa, objectiva i contrastada. Al laboratori, la participació activa de l ' alumnat els permet de familiaritzar-se amb el procés de formació de conceptes i coneixements científics, obtenint així una visió de la Ciència més completa.

Geotextiles and geomembranes, made from synthetic polymers such as woven or non-woven fabrics, membranes, sheets and composites, have a variety of uses: in erosion control systems, embankments, pollution control systems, water storage, drainage and road construction. Taking all these applications into consideration, numerous laboratory and prototype tests were performed, the results of which have been published in this handbook, which includes sections on: · geotextile and geomembrane history · function analysis · production technology · project realization · soil reinforcement Designed for civil engineers, this text covers a broad range of areas and provides a useful handbook for those working with geotextiles and geomembranes.
