Explores how the human brain works, covering such topics as memory, sleep, dreaming, dysfunctions, and new technology used to learn more about it.

First published in 1915, this volume contains a detailed guide to the preparation and manufacture of perfumes and cosmetics, originally intended for professional perfumers and cosmetic manufacturers. Although old, this volume contains a wealth of practical and useful information, and it is highly recommended for modern readers with an interest in perfumery. Contents include: "The History of Perfumery", "About Aromatic Substances in General", "Odors form the Vegetable Kingdom", "The Aromatic Vegetable Substances Employed in Perfumery", "The Animal Substances Used in Perfumery", "The Chemical Products Used in Perfumery", "The Extraction of Odors", "The Special Characteristics of Aromatic Substances", etc. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with a specially commissioned introduction on essential oils.

Cosmetics for skin, hair, and nails play a vital part in the management and treatment of many dermatological conditions; unfortunately, they may also at times be the cause of some dermatological problems. They are therefore subjects where dermatologists need to be aware of the major commercial developments taking place, in addition to the many common Over The Counter products already available, in order to be vigilant in checking the possible benefits or disadvantages for patients. This text takes a serious look at the integration of skin care products, cosmetics, hair adornments, and nail cosmetics in the daily practice of dermatology, expanding the realm of disease treatment beyond diagnosis and treatment into the maintenance phase of healthy skin, hair, and nails.
