the arbitrary use of power, or, more
precisely, it demands a legal basis

the traditional legality principle is under
pressure because of the creation of

such urgent European problems as the
following: ; the use of the

Over the past decade, we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement.

Antitrust policy, it is now suggested,

should focus on enhancing economic efficiency, which we are to believe will promote consumer welfare. Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value – such as the

Despite the international community's recognition of social protection as a human right, the vast majority of the

world's population still has no access to social protection. In a major effort to address this situation, the International Labour Conference unanimously adopted the Social Protection Floors Recommendation 202 of 2012.

However, because of the wide variety of possible schemes (and techniques

important values relating to social
