Conversing in a mausoleum with the dead, an eccentric recluse is tugged back into the world by a pair of ghostly lovers bearing an extraordinary gift-the final chance for his own happiness. When challenged by a faithless wife and aided by a talking raven, the lives of the living and the dead may be renewed by courage and passion, but only if not belatedly. Told with an elegiac wisdom, this & delightful tale of magic and otherworldly love & is a timeless work of fantasy imbued with hope and wonder. After multiple printings since 1960, this newest edition will contain the author's recent revisions and will stand as the definitive version of an ageless classic.

A Silent Place: Death in Mycenaean Lakonia is the first book-length systematic study of the Late Bronze Age (LBA) burial tradition in south-eastern Peloponnese, Greece, and the first to comprehensively present and discuss all Mycenaean tombs and funerary contexts excavated and/or simply reported in the region from the 19th century to present day. The book will discuss and reconstruct the emergence and development of the Mycenaean mortuary tradition in Lakonia by examining the landscape of death, the burial architecture, the funerary and post-funerary customs and rituals, and offering patterns over a longue durée. The author proposes patterns of continuity from the Middle Bronze Age (even the Early Bronze Age in terms of burial architecture) to the LBA and, equally important, from the Late Bronze Age to the Early Iron Age, and reconstructs diachronic processes of invention of tradition and identity in Mycenaean communities, on the basis of tomb types and their material culture. The text highlights the social, political and economic history of Late Bronze Age Lakonia from the evolution of the Mycenaean civilisation and the establishment of palatial administration in the Spartan vale, to the demise of Mycenaean culture and the turbulent post-collapse centuries, as reflected by the burial offerings. The book also brings to publication the chamber tombs at Epidavros Limera that remained largely unpublished

since their excavation in the 1930s and 1950s. Epidavros Limera was one of the most important prehistoric coastal sites in prehistoric southern Greece (early 3rd-late 4th millennium BC), and one of the main harbour towns of the Mycenaean administrative centres of central Lakonia. It is one of very few Mycenaean sites that flourished uninterruptedly from the emergence of the Mycenaean civilisation until after the collapse of the palatial administration and into the transition to the Early Iron Age. The present study of the funerary architecture and of the pottery from the tombs suggests that the site was responsible for the introduction of the chamber tomb type on the Greek mainland in the latest phase of the Middle Bronze Age (definitely no later than the transitional Middle Bronze Age/Late Bronze Age period), and not in the early phase of the Late Bronze Age (Late Helladic I) as previously assumed.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning...[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

The Oxford Handbook of the Archaeology of Death and Burial reviews the current state of mortuary archaeology and its practice, highlighting its often contentious place in the modern socio-politics of archaeology. It contains forty-four chapters which focus on the history of the discipline and its current scientific techniques and methods. Written by leading, international scholars in the field, it derives its examples and case studies from a wide range of time periods, such as the middle palaeolithic to the twentieth century, and geographical areas which include Europe, North and South America, Africa, and Asia. Combining up-to-date knowledge of relevant archaeological research with critical assessments of the theme and an evaluation of future research trajectories, it draws attention to the social, symbolic, and theoretical aspects of interpreting mortuary archaeology. The volume is well-illustrated with maps, plans, photographs, and illustrations and is ideally suited for students and researchers.

This second edition, which has also been edited by Samson Katz, utilizes around half of the original text, of which a significant portions has been revised and updated. The remainder comprises new material reflecting both the changes in attitudes generally towards death and dying, and also designed to meet the needs of students undertaking the revised curriculum of the K260. This book will stimulate thinking and challenge the personal views of both academics and those in practice. ...[A] valuable tool for both those new to the area of palliative and cancer care and those experienced professionals searching for a new angle on several key topics in relation to ethical issues occurring in this speciality... [A]n excellent balance of theoretical contents and moving prose... [T]his book is directed towards all professionals working in health and social care. ...This book is a must for pre-registration students wishing to gain greater understanding of the psychosocial issues faced by those with a terminal illness and their significant others' - *Nurse Education Today* The fully revised and updated edition of this bestselling collection combines academic research with professional and personal reflections. *Death, Dying and Bereavement* addresses both the practical and the more metaphysical aspects of death. Topics such as new methods of pain relief, guidelines for breaking bad news, and current attitudes to euthanasia are considered, while the mystery of death and its wider implications are also explored. A highly distinctive interdisciplinary approach is adopted, including perspectives from literature, theology, sociology and psychology. There are wide-ranging contributions from those who come into professional contact with death and bereavement - doctors, nurses, social workers and councillors. In addition there are more intimate personal accounts from carers and from bereaved people. *Death, Dying and Bereavement* is the Course Reader for The Open University course *Death and Dying*, which is offered as part of The Open University Dipoma in Health and Social Welfare. Praise for the First Edition: 'The book does give a broad overview of many of the issues around death, dying and bereavement. It raises the reader's awareness and encourages deeper investigation at every level. It is easy to read and therefore accessible to a wide audience' - *Changes* 'Provides a richly woven tapestry of personal, professional and literary accounts of death, dying and bereavement' - *Health Psychology Update* 'Offers a unique collection of fascinating information, research, stories, poems and personal reflections. It is unusual to experience such a diversity of writings in one book' - *Nursing Times* 'It brings together the knowledge and skills from a multi-occupational group and thereby offers an opportunity, to whoever reads it, to enable better experiences for those who are dying and bereaved' - *Journal of Interprofessional Care* 'For those trying to help the dying and bereaved, this volume will inspire and move you as much as it will inform and guide your work' - *Bereavement Care* 'Provides a unique overview, and in many areas, penetrating insights into various aspects of death, dying and bereavement. One of its major strengths is that it brings together a wide and varied discourse on death across cultures and through time' - *British Journal of Sociology*

"This volume explores the tension between mass death and individual loss by linking long-term patterns of mourning, burial, and grief with the short-term cataclysmic violence unleashed by two world wars. How

various "cultures of death" shaped the broader historical relationship between the living and the dead in modern Germany is the main concern of this book. It contributes to a history of death in Germany that does not begin and end with the Third Reich."--BOOK JACKET.

When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an "overtreated" dying is feared, untreated pain or emotional abandonment are equally frightening. *Approaching Death* reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. *Approaching Death* considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom "nothing can be done."
