He cries alone at night; he is hardly 4; it is almost 4 am. The world around him is fast asleep. He is new to this constant grappling with his mind and he learns how to torture himself. He comes up with elemental questions of life and philosophy but finds no answers and this frustrates him. He is a thinker; so much so that he cant sleep, it hurts. He doesnt cry anymore. He is close to 24. He thinks he has seen everything but then half the idiots out there feel the same way. So what makes him special? He is special because at different times and in different roles in his life he has touched perfection even if he has done so momentarily. The crash n burn too is poetic and beautiful. Lazarus! He really has taken some outstanding catches and scored some unbelievable goals and more than anything else he wants the world to know this about him. Perhaps it is the only thing he wants the world to know about him. So this book is about the 4 year old, it is also about the 24 year old, and pretty much everything in between; the good, the bad and the ugly!

This book comprises select proceedings of the international conference ETAEERE 2020. This volume covers latest research in advanced approaches in automation, control based devices, and adaptive learning mechanisms. The contents discuss the complex operations and behaviors of different systems or machines in different environments. Some of the areas covered include control of linear and nonlinear systems, intelligent systems, stochastic control, knowledge-based systems applications, fault diagnosis and tolerant control, and real-time control applications. The contents of this volume can be useful for researchers as well as professionals working in control and automation.

This book is a comprehensive guide to ultrasound in obstetrics and gynaecology. Beginning with an introduction to equipment, the next chapters discuss the basic principles of ultrasound and its use in the different trimesters of pregnancy. The following chapters explain the importance of ultrasound as a diagnostic tool describing its use for placenta evaluation, amniotic fluid assessment, measuring cervical length and in multiple pregnancy. The final chapters cover ultrasound-guided foetal invasive procedures, Doppler, 3D ultrasound, and ultrasound in reproductive medicine. This practical guide is further enhanced by more than 350 ultrasound images, diagrams and tables to assist learning. Key points
Comprehensive guide to ultrasound in obstetrics and gynaecology Emphasises use of ultrasound as a diagnostic tool Explains use of ultrasound in different trimesters of pregnancy Highly illustrated with more than 350 ultrasound images, diagrams and tables
