400 multiple choice test questions and detailed answers covering all topics on the AP World History exam from 8000 B.C.E. to the present.

As colleges continue to become more selective, students who want to do well on the AP World History exam will rely on Kaplan to help them score higher and stand out from the competition.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The conventional history of animals could be more accurately described as the history of human ideas about animals. Only in the last few decades have scholars from a wide variety of disciplines attempted to document the lives of historical animals in ways that recognize their agency as sentient beings with complex intelligence. This collection advances the

field further, inviting us to examine our recorded history through an animal-centric lens to discover how animals have altered the course of our collective past. The seventeen scholars gathered here present case studies from the Pacific Ocean, Africa, Europe, and the Americas, involving species ranging from gorillas and horses to salamanders and orcas. Together they seek out new methodologies, questions, and stories that challenge accepted historical assumptions and structures. Drawing upon environmental, social, and political history, the contributors employ research from such wide-ranging fields as philosophy and veterinary medicine, embracing a radical interdisciplinarity that is crucial to understanding our nonhuman past. Grounded in the knowledge that there has never been a purely human time in world history, this collection asks and answers an incredibly urgent question for historians and others interested in the nonhuman past: in an age of mass extinctions, mass animal captivity, and climate change, when we know much of what animals have done in the past, which of our activities will we want to change in the future?

The book presents the most common problems seen in neuro-ophthalmology in a case-based learning format that provides rapid access and is easy to read. The user friendly format guides and stimulates the reader to identify the distinctive symptoms in the main complaint and history; to define the differentiating signs on neuro-ophthalmic exam; and to describe the key laboratory or neuroimaging in specific entities. It also challenges the reader to ask additional questions of themselves and others by

providing an initial set of questions and answers on specific neuro-ophthalmologic topics. The questions chosen are meant to simulate “real world” questions in the clinic; the answers given serve to provide both the rationale for the correct answer and the explanations or reasons for the incorrect but plausible answers that might distract or mislead a clinician in specific neuro-ophthalmic cases. In the summer of 1900, bands of peasant youths from the villages of north China streamed into Beijing to besiege the foreign legations, attracting the attention of the entire world. Joseph Esherick reconstructs the early history of the Boxers, challenging the traditional view that they grew from earlier anti-dynastic sects, and stressing instead the impact of social ecology and popular culture.

The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the "big history" movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.
