This is a comprehensive review for the new trauma-certified registered nurse exam, featuring innovative clinical judgment--enhancing content review, 500 practice-test Q&As with rationales, test-taking skills, and in--depth coverage of the test blueprint. This review is distinguished by its unique "Think in Questions" format, which helps readers to anticipate the kinds of questions that might be asked and promotes critical thinking throughout the exam. The content review is comprised of bite-size sections for easier learning and memorization that include thousands of unfolding questions, answers, and hints. The review's user-friendly format guides candidates through each topic with a short content review followed by a Socratic-style Q&A reasoning process to assist in arriving at the best possible clinical judgment. It also includes plentiful tables and charts to reinforce learning, a chapter on test-taking skills, specific guidance on preparing for the certification exam, and useful suggestions related to the exam format. Key Features: Goes beyond mere memorization of facts with "Think in Questions" Socratic-style content review Provides content review, practice exam-style Q&A with rationales, test-taking skills, and test blueprint format Includes thousands of unfolding questions, answers, and hints Contains "bite-size" sections for each topic for easier learning and memorization Includes 500 exam-style questions with rationales The Board of Certification for Emergency Nursing (BCEN) is the sole owner of the Trauma Certified Registered Nurse (TCRN) certification program. BCEN does not endorse any TCRN certification exam review resources or have a proprietary relationship with Springer Publishing Company.

Covering the most important topics in trauma anesthesia, this updated edition provides anesthesiology trainees and practitioners with a practical basis for managing trauma patients. Many recent advances in trauma care are identified, including paradigm shifts in the management of bleeding and coagulopathy, new neuromuscular blockade and anticoagulant reversal drugs, and updated clinical practice guidelines. This volume provides a concise, practical review of the essential elements in the care of the severely injured trauma patient, including emergency airway management, fluid and blood resuscitation, monitoring, coagulation therapy, regional and general anesthesia, and perioperative care. Edited by two of the most experienced trauma anesthesiologists in the United States, with chapters written by experts from leading US and Canadian trauma centers with the highest and most varied caseload of critically injured patients, Essentials of Trauma Anesthesia identifies new trends in surgery and anesthesiology practices that impact on the management of trauma patients.
