Download Free Business Process Reengineering

Business Process Reengineering (BPR), focuses on strategic & general management issues that need to be resolved before an organization embarks on a BPR project. Assessing the new process' development picks up at the point where the organization has decided to begin a BPR project. It focuses on the management of the BPR team, the team's process redesign activities, & the business case it develops. Assessing project implementation & results deals with the problems involved in piloting & deploying a new BPR.

Organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are you really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant,
