The Psychodynamics and Psychology of Gambling is the first volume in the four-volume The Gambling Theory and Research Series. Author Mikal Aasved felt a need to fill what he perceived to be a lack of background sources

or reviews of literature
pertaining to gambling
theory and research. This
series will present major
findings of leading
researchers as they study
the causes and effects of
gambling, both recreational

Hattingberg, Fenichel,
Bergler, Simmel, Greenson,
Stekel, and others. Aasved
includes sections on
behavioral (learning or
reinforcement theory)
psychological approaches to
gambling with discussion of

Skinner's ideas and research findings as well as Pavlov's principles. This book begins with the question 'Why do people gamble?' and offers many theories proposed by clinicians, laboratory and field researchers, and

participants as they seek to explain the motivation behind gambling. The differences between gambling as entertainment and gambling compulsion is a focus of much research. Aasved addresses ideas set
