Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.

This revitalized new edition of Strategic Operations Management focuses on the four core themes of operations strategy, a vital topic for any company's objectives: strategy, innovation, services, and supply. Expertly authored by a team of Europe's top scholars in the field, the text is enhanced by the addition of new case examples, graphic images, learning objectives, discussion questions, and suggestions for further reading. In addition, the companion website offers a comprehensive set of web links and videos to augment the learning experience. This truly comprehensive volume underscores the differences between the core theories that underpin operations management. Students taking MBA, MSc and MBM classes on operations management, advanced operations management, and strategic operations management will find this textbook fulfills all their requirements whilst advanced undergraduate classes in these areas will also find the book an essential read.

Identifies more than four hundred private, commercial, and military aircraft, and briefly describes the history and characteristics of each.
