performance practice

Vols. for 1957-61 include an additional (mid-January) no. called Directory issue, 1st-5th ed. The 6th ed. was published as the Dec. 1961 issue.

This collection brings together for the first time essays on postmodernism and music and covers a wide range of musical styles including concert music, jazz, film music, and popular music.

This comprehensive volume offers a wide-ranging perspective on the stories that art music has told since the start of the 20th century. Contributors challenge the broadly held opinion that the loss of tonality in some music after 1900 also meant the loss of narrative in that music. To the contrary, the editors and essayists in this book demonstrate how experiments in approaching narrative in other media, such as fiction and cinema, suggested fresh possibilities for musical narrative, which composers were quick to exploit. The new conceptions of time, narrative voice, plot, and character that accompanied these experiments also had a significant impact on contemporary music. The repertoire explored in the collection ranges across a wide variety of genres and includes composers from Charles Ives and the Pet Shop Boys to Thomas Ad è s and Dmitri Shostakovich.

In *The Music Machine*, Curtis Roads brings together 53 classic articles published in *Computer Music Journal* between 1980 and 1985.
