Publisher description.

Access Free Design Criteria

Publisher Description

For Mosques And Islamic

Centers
From the avant-garde design of the Islamic Cultural Center in New York City to the simplicity of the Dar al-Islam Mosque in Abiquiu, New Mexico, the American mosque takes many forms of visual and architectural expression. The absence of a single, authoritative

Access Free Design Criteria

For Mosques
And Islamic
Centers

model and the plurality of design nuances reflect the heterogeneity of the American Muslim community itself, which embodies a whole spectrum of ethnic origins, traditions, and religious practices. In this book, Akel Ismail Kahera explores the history and theory of Muslim religious aesthetics in the United

Access Free Design Criteria

States since 1950. Using a notion of deconstruction based on the concepts of "jamal" (beauty), "subject," and "object" found in the writings of Ibn Arabi (d. 1240), he interprets the forms and meanings of several American mosques from across the country. His analysis contributes to three debates within the

Access Free Design Criteria

Formulation of a Muslim aesthetics in North America—first, over the meaning, purpose, and function of visual religious expression; second, over the spatial and visual affinities between American and non-American mosques, including the Prophet's mosque at Madinah, Arabia; and third, over the relevance of culture,

Access Free Design Criteria

place, and identity to the making of contemporary religious expression in North America.

Regional Airports have become increasingly important elements of the air network system, both as feeders of hub-and-spoke services and as origins or destination of point-to-point services. Congestion at

Access Free Design Criteria

the main hubs and increasing demand for air transportation - both for passengers and freight services – necessitates reevaluation of the overall air systems, with regional airports taking an ever expanding role.

Optimisation of air transportation systems within the framework of other forms of transport

Access Free Design Criteria

plays an important part
in the present quest for
sustainability.

Congestion nowadays is
not only associated with
countries such as the
USA and those in the
EU, but also a variety of
other countries with fast
developing economies
where there is a strong
increase in air
transportation
demand. The revolution

Access Free Design Criteria

For Mosques
And Islamic
Centers

of the existing airport system, including regional airports requires the developing of new optimisation tools which can simulate the whole process and produce optimal solutions. These models are also essential to predict future demands and, in particular the role that regional airports will play. The

Access Free Design Criteria

siting of new airports involves taking into consideration a variety of environmental, ecological, social and economic factors which transcend the problem of transportation resources optimisation itself. Regional Airports can be a powerful driving force behind the development of an area and conversely can

Access Free Design Criteria

For Mosques
And Islamic
Centers

result in major problems
if they are wrongly
sited.

A unique appraisal of
the architectural
developments of the
contemporary mosque.

This book is comprised
of articles and papers
that have come about
after years of academic
and applied research

Access Free Design Criteria

endeavors of the practitioners and academicians in the field of urban and regional development planning. Most of these articles have already been presented and deliberated in national and international conferences held in different parts of the world, namely:

Indianapolis, Newcastle

Access Free Design Criteria

upon Tyne, Rome,

Istanbul, Cairo,

Alexandria, Vienna,

Stockholm, Jeddah,

Riyadh, Jubail,

Islamabad, Penang, and

Bandung. The concepts

and case studies

described in this book

bring home the fact that

the world is undergoing

a gyrational transition.

Not only are developed

and developing

Access Free Design Criteria

For Mosques
And Islamic
Centers

countries getting influenced by each other and transforming due to a process of circular causation, but each of the two sets of countries are also undergoing a simultaneous internal transformation due to the differential infusion of technology and indigenous entrepreneurship. As a consequence, highly

Access Free Design Criteria

For Mosques
And Islamic
Centers

diversified urban
systems are getting
integrated interactively,
leading to the formation
of a global village and
achievement of a unity
in diversity!

This timely book
explores how the
Malays and Muslims in
general are faced with
challenges in the fields
of business, economy

Access Free Design Criteria

and politics, in the modern era of globalisation. These research findings can help the Muslim community to enhance international integration, particularly in Malaysia and Southeast Asia. In this work, scholarly and expert authors explore Islamic perspectives on communication, art and culture, business, and

Access Free Design Criteria

For Mosques
And Islamic
Centers

law and policy. They respond to the need to uphold and strengthen the culture, arts and heritage of the Malays. Readers are invited to explore the challenges for the Malay and Muslim world and to evolve strategies to ensure competitiveness, dynamism and sustainability. Topics such as Islamophobia,

Access Free Design Criteria

drug trafficking, savings behaviours and the role of social media are addressed. These reviewed papers were presented at the International Conference on Islamic Business, Art, Culture & Communication 2014, held in Melaka, Malaysia. They have the potential to strengthen aspects of Islamic

Access Free Design Criteria

economy and leadership, if translated into action plans. This book represents essential reading for scholars of Islamic studies and will be of interest to those examining Southeast Asia and the Malay world.
