Since it's used throughout their enormous code bases, studios use it to maintain and improve their games, and look for it constantly when hiring new developers. Game Programming in C++ is a practical, hands-on approach to programming 3D video games in C++. Modeled on Sanjay Madhav's game programming courses at USC, it's fun, easy, practical, hands-on, and complete. Step by step, you'll learn to use C++ in all facets of real-world game programming, including 2D and 3D graphics, physics, AI, audio, user interfaces, and much more. You'll hone real-world skills through practical exercises, and deepen your expertise through start-to-finish projects that grow in complexity as you build your skills. Throughout, Madhav pays special attention to demystifying the math that all professional game developers need to know. Beginning in 1869, when the study of homosexuality can be said to have begun with the establishment of sexology, this Encyclopedia offers accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavours. While gays and lesbians have shared many aspects of life, their histories and cultures developed in profoundly different ways. To reflect this crucial fact, the Encyclopedia has been prepared in two separate volumes assuring that both histories receive full, unbiased attention and that a broad range of human experience is covered. Written by some of the most famous names in the field, as well as new researchers this is intended as a reference for students and scholars in all areas of study, as well as the general public.

This is the first substantial reference work in English on the various forms that constitute "life writing." As this term suggests, the Encyclopedia explores not only autobiography and biography proper, but also letters, diaries, memoirs, family histories, case histories, and other ways in which individual lives have been recorded and structured. It includes entries on genres and subgenres, national and regional traditions from around the world, and important auto-biographical writers, as well as articles on related areas such as oral history, anthropology, testimonies, and the representation of life stories in non-verbal art forms.
