Master your course with the practice and hands-on-activities that will help you get ready for the medical office. In this new edition of Study Guide for Jones & Bartlett Learning's Comprehensive Medical Assisting, the exercises and activities align with the most current Medical Assisting Education Review Board (MAERB) of the American Association of Medical Assistants (AAMA) curriculum standards. The Study Guide is divided into sections that coincide with the textbook and includes exercises that reinforce the knowledge and skills required of all Medical Assistants.

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.
