foods, nondrug and preventive measures, and complementary therapies. Its goal is to develop the knowledge and problem-solving skills needed to assess a patient's health status and current practice of self-treatment, to determine whether self-care is necessary or appropriate, and, if appropriate, to recommend safe and effective self-care measures.

The purpose of this book is to focus on major considerations in the clinical use of botanicals as an integrated therapy in current health care. The book uses an organ system approach to presenting clinical evidence on the use of botanicals for common conditions. The chapters include brief sections on background and pharmacognosy,

The Practitioner's Quick Reference to Nonprescription Drugs contains concise information derived from the American Pharmacists Association's comprehensive Handbook of Nonprescription Drugs: An Interactive Approach to Self-Care, 16th edition. The book features 25 common self-treatable conditions and focuses on content that practitioners are most likely to need during self-care consultations with patients. Conditions covered include acne, musculoskeletal disorders, the common cold, cough, fever, and headache. The Practitioner's Quick Reference to Nonprescription Drugs is a must-have resource for busy health care practitioners. **KEY FEATURES:** Each chapter begins with an algorithm that

Ed. presents treatment and follow-up recommendations as well as exclusions for self-treatment. The accompanying text expands on the algorithm's recommendations and includes essential additional information (e.g., cautions and contraindications, drug interactions) plus brief background information on the condition. Valuable appendices cover administration guidelines for nasal and ophthalmic dosage formulations, FDA pregnancy risk categories, and recommended intakes of vitamins and minerals. Tables, bulleted key points, and detailed index make quick lookups easy.

than merely ideological--ways for pharmacists to utilize their extensive clinical knowledge and fill a major gap in American health care. It discusses barriers, necessary skills, required knowledge, and issues related to preparation, interventions, patient outcomes, economic aspects, and marketing considerations for therapeutic areas commonly addressed in the outpatient setting. The beginning of the book delves into the general management skills necessary to provide and implement advanced patient care services, including documentation, patient interviewing, and medication therapy management. Important chapters discuss disease states that would most likely be amenable to development of pharmacy services, including: Asthma Smoking Cessation
