From the divine right of Charles I to the civil rights struggle of Rosa Parks, 25 non-fiction stories provide a panorama of people whose actions helped form our legal system and our world. Constitution makers, Civil War enemies, Irish rebels, World War II Nazis, murder and passion, art and prejudice appear in a page-turner that reads like a mystery novel. Did Dr. Samuel Mudd participate in the Lincoln assassination? Was Captain Charles McVay III responsible for the sinking of the USS Indianapolis? Did Levi Weeks kill pretty Elma Sands? Read about unknown founder James Wilson and Hitler's lawyer, Hans Frank. Discover the back stories of landmark cases and enjoy the cross examination and trial skills of lawyers in top form.

The fifth edition of the only comprehensive text dealing exclusively with rare or infrequently encountered malignancies in adults and children is an essential resource for any clinical oncologist. Encompasses all the information needed to diagnose and manage uncommon cancers, an area where advice and guidance is typically scarce Fully revised with new material and an evidence-based, teach-by-example approach Provides insight on real-world decision making in the clinical setting Edited and authored by a highly experienced and senior team of medical oncologists, radiation oncologists, and other specialists, giving a balanced and complete overview Extensively illustrated in full color throughout, including heat maps to show gene expression

"Garnett's Life will not need to be written again." —Andrew Morton, Times Literary Supplement A penetrating biography of the most important English-language editor of the early twentieth century During the course of a career spanning half a century, Edward Garnett—editor, critic, and reader for hire—would become one of the most influential men in twentieth-century English literature. Known for his incisive criticism and unwavering conviction in matters of taste, Garnett was responsible for identifying and nurturing the talents of a generation of the greatest writers in the English language, from Joseph Conrad to John Galsworthy, Henry Green to Edward Thomas, T. E. Lawrence to D. H. Lawrence. In *An Uncommon Reader*, Helen Smith brings to life Garnett ' s intimate and at times stormy relationships with those writers. ( " I have always suffered a little from a sense of injustice at your hands, " Galsworthy complained in a letter.) All turned to Garnett for advice and guidance at critical moments in their careers, and their letters and diaries—in which Garnett often features as a feared but deeply admired protagonist—tell us not only about their creative processes, but also about their hopes and fears. Beyond his connections to some of the greatest minds in literary history, we also come to know Edward as the husband of Constance Garnett—the prolific translator responsible for introducing Tolstoy, Dostoevsky, and Chekhov to an English language readership—and as the father of David " Bunny " Garnett, who would make a name for himself as a writer and publisher. " Mr. Edward Garnett occupies a unique position in the literary history of our age, " E. M. Forster wrote. " He has done more than any living writer to discover and encourage the genius of other writers, and he has done it without any desire for personal prestige. " An absorbing and masterfully researched portrait of a man who was a defining influence on the modern literary landscape, *An Uncommon Reader* asks us to consider the multifaceted meaning of literary genius.

Britain in the long nineteenth century developed an increasing interest in science of all kinds. The essays in this collection uncover this symbiotic relationship between literature and science.

A comprehensive bibliography of books and short fiction published in the English language.
