This book contains the papers presented at the IMechE and SAE International, Vehicle Thermal Management Systems Conference (VTMS10), held at the Heritage Motor Centre, Gaydon, Warwickshire, 15-19th May 2011. VTMS10 is an international conference organised by the Automobile Division and the Combustion Engines and Fuels Group of the IMechE and SAE International. The event is aimed at anyone involved with vehicle heat transfer, members of the OEM, tier one suppliers, component and software suppliers, consultants, and academics interested in all areas of thermal energy management in vehicles. This vibrant conference, the tenth VTMS, addresses the latest analytical and development tools and techniques, with sessions on: alternative powertrain, emissions, engines, heat exchange/manufacture, heating, A/C, comfort, underhood, and external/internal component flows. It covers the latest in research and technological advances in the field of heat transfer, energy management, comfort and the efficient management of all thermal systems within the vehicle. Aimed at anyone working in or involved with vehicle heat transfer Covers research and technological advances in heat transfer, energy management, comfort and efficient management of thermal systems within the vehicle

Practical Wisdom in Management is the first in-depth case-study book to explore how practical wisdom from spiritual and philosophical traditions inspires corporate culture and leadership. The outcome of the Practical Wisdom Initiative, between The Academy of Business in Society (ABIS) and Yale University Center for Faith and Culture, it seeks to construct a bridge between the worlds of management and the spiritual and philosophical traditions. Covering ten major worldwide religions, Theodore Malloch provides an overview of the practical wisdom of the major faith traditions for management. It includes case studies of over twenty multinational corporations focusing on their values, spiritual inspiration and business strategy. It features case studies on corporations including: Ascension Health; Michelin; DANONE Group, Walmart; TOMS; Marriott; HSBC; Four Seasons; Guangzhou Eversunny Trading and Toyota. It is essential reading for business leaders, researchers and students of business ethics and spirituality courses and includes full teaching guidance.

This textbook is designed to help students understand the key issues of global business by connecting theory with reality. Divided into three parts, it covers critical issues of international business, introducing readers to topics they will connect with, and discussing core concepts. With a user-friendly pedagogy and a host of helpful visuals, the authors offer a practitioner's perspective on global business knowledge, examining familiar theory on trade, direct investment, and political environment alongside fresh topics, like geopolitical conflicts, emerging markets, and sustainability. Over sixty case studies are included to illustrate the magnitude and complexity of global business involving different stakeholders. Undergraduate students looking for an introduction to international business and graduate students looking to apply their knowledge will find Global Business stimulating, since it demonstrates how theories and concepts work in real-world business settings.

Particularly in developing economies, there is a need for business alignment with innovation strategy and execution of strategies. The authors demonstrate through real-world examples and case studies how a firm can use innovation at all levels (strategic, functional and operational) to provide benefits to the entire value chain.

The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

This book examines the two most populous nations on earth – India and China – in an effort to demystify the interaction between intellectual property rights (IPR) regimes, innovation and economic growth by critically looking at the economic and legal realities. In addition, it analyzes the question of how innovation can best be transformed into IPR, and how IPR can best be exploited to encourage innovation. Comparing and contrasting these two giant nations can be highly beneficial as China and India were the two fastest-growing economies in the last three decades, and together their populations make up one third of the world's total population; as such, exploring how to sustain their growth via innovation and commercialization of IPR could have a tremendous positive impact on global well-being. While a study of these two mega countries with such diverse dimensions and magnitudes can never be truly comprehensive, this joint effort by scholars from law, business management and economics disciplines that pursues an empirical approach makes a valuable contribution. Divided into three parts, the first offers an in-depth doctrinal and empirical analysis. The second part exclusively focuses on India, while the last is dedicated to China.
