The Technical Reference Handbook is a desktop or shop reference for mechanical trades, manufacturing, and industrial environments. This book presents subject matter in a logical progression, summarizes key concepts, and provides easy-to-use formulas and tables. This revised edition updates information related to standards and evolving technology and adds or expands on many individual topics.

Social media has helped boost the culture of intoxication, a central aspect of young people's social lives in many Western countries. Initial research suggests that these technologies enable highly-nuanced, targeted marketing and innovations ¶ creating new virtual spaces that alter the dynamics and consequences of drinking cultures in significant ways. Youth Drinking Cultures in a Digital World focuses on how pervasive social networking technologies contribute to drinking cultures. It brings together international contributions from leading researchers in this emerging field to explore how new technologies are reconfiguring the key themes, traditional interests, practices and concerns of alcohol-related research with young people. It is particularly concerned with three important areas, namely: identities, social relations and power alcohol marketing and commercialisation public health and regulating alcohol promotion. This innovative book includes original research and commentary and is a must-read for academics and researchers in the areas of public health, psychology, sociology, media studies, youth studies and alcohol studies.

CLICK HERE to download the chapter on "Backcountry Medicine" from Mountain Travel & Rescue (Provide us with a little information and we'll send your download directly to your inbox) Completely updated and expanded official rescue workbook of the National Ski Patrol, now available to other wilderness first responders and the general public \* Authoritative and comprehensive mountain safety and rescue text -- your most valuable search and rescue equipment \* Recommended for classroom and educational program adoption \* All-new illustrations As a leading authority of on-mountain safety since 1938, the nonprofit National Ski Patrol has dedicated itself to serving the public and the outdoor recreation industry by providing education, and accreditation to emergency care and safety services providers. Their core mountain rescue educational workbook, Mountain Travel & Rescue (first published in 1995), was researched, written, and reviewed by volunteer members and experts from all over the country, and is designed to help ski patrollers train, rescue, and survive in mountain environments, at resorts, in the backcountry, and at any time of year. Mountain Travel & Rescue is a valuable piece of mountain rescue equipment. In addition to new illustrations, this edition offers significantly expanded lesson sections, a new backcountry medicine section, and more. Mountain Travel & Rescue: National Ski Patrol's Manual for Mountain Rescue is organized into four major sections: Survival, Travel, Backcountry Considerations, and Search and Rescue. It includes extensive appendixes, including medical equipment lists, a questionnaire, and a glossary and is a valuable tool for anyone who deals with search and rescue or is interested in mountain rescue basics.

When social workers draw on experience, theory, or data in order to develop new strategies or enhance existing ones, they are conducting intervention research. This relatively new field involves program design, implementation, and evaluation and requires a theory-based, systematic approach. Intervention Research presents such a framework. The five-step strategy described in this brief but thorough book ushers the reader from an idea's germination through the process of writing a treatment manual, assessing program efficacy and effectiveness, and disseminating findings. Rich with examples drawn from child welfare, school-based prevention, medicine, and juvenile justice, Intervention Research relates each step of the process to current social work practice. It also explains how to adapt interventions for new contexts, and provides extensive examples of intervention research in fields such as child welfare, school-based prevention, medicine, and juvenile justice, and offers insights about changes and challenges in the field. This innovative pocket guide will serve as a solid reference for those already in the field, as well as help the next generation of social workers develop skills to contribute to the evolving field of intervention research.

MARPOL VI was developed through the International Maritime Organization (IMO), a United Nations agency that deals with maritime safety and security, as well as the prevention of marine pollution from ships. MARPOL is the main international agreement covering all types of pollution from ships. Annex VI aims to reduce emissions from ships through international regulations. Regulation 14 - Restricts SOx emissions from ships by introducing a maximum sulphur content in marine fuels of 4.5 per cent. In addition, MARPOL Annex VI identifies SOx emission control areas (SECA)

Channeling is a fascinating mystery. It has enthralled people for thousands of years. And while it is captivating to some, it remains a subject shrouded in obscurity to most. In this extraordinary work, join Henry Reed ashe draws on American psychic Edgar Cayce's inspiring word and principles to show how we can reach our higher selves, understand the nature of our super and subconscious minds, and heal ourselves by using our soul as a conduit. Reed reveals how the great, untapped power of our spirit can transform our lives in very meaningful ways.

Proteinases and their Inhibitors: Structure, Function, and Applied Aspects documents the proceedings of an international symposium organized by the Department of Biochemistry, Jozef Stefan Institute, E. Kardelj University, Ljubljana, and the Department of Organic Chemistry and Biochemistry, Rudjer Boskovic Institute, Zagreb, held in Portoroz, Yugoslavia, September 29-October 3, 1980. The volume contains 34 papers that are organized into four parts. Part I on biological functions includes studies such as muscle protein breakdown in human catabolic state and age-dependent changes in intracellular protein turnover. The papers in Part II, which deals with properties and structure of enzymes, cover topics such as structures and biological functions of cathepsin B and L; and human erythrocytes peptidases. Part III is devoted to industrial applications, such as exogenous proteinases in dairy technology and the application of immobilized proteinases. Part IV on proteinase inhibitors includes papers on thiol inhibitors of proteases and and intracellular neutral proteinases and inhibitors. The papers in this volume provide new data, concepts, and visions which will not only prove useful, but will also stimulate further investigations of proteinases and their inhibitors.
