This was fixed by a hardware modification (together with a software update) and has to be done by Kenwood service. So if you consider to buy a used TS590S, make sure this fix is included. Some early production TS-590S radios did, indeed, have an overshoot issue. Kenwood will make the required modification for any such radio free of charge.

Second Hand Kenwood TS-590S HF Transceiver, The Kenwood TS-590S provides impressive, yet affordable amateur operation on the HF and 6 meter bands. Thanks to a down-conversion receiver, narrow first roofing filter and dedicated first mixer, the TS-590S has the best dynamic range in its class when handling unwanted adjacent off-frequency signals¹.

This third edition reviews the epidemiology, policies, programs and outcome indicators that are used to determine improvements in nutrition and health that lead to development. This greatly expanded third edition provides policy makers, nutritionists, students, scientists, and professionals with the most recent and up-to-date knowledge regarding major health and nutritional problems in developing countries. Policies and programs that address the social and economic determinants of nutrition and health are now gaining in importance as methods to improve the status of the most vulnerable people in the world. This volume provides the most current research and strategies so that policy makers, program managers, researchers and students have knowledge and resources that they can use to advance methods for improving the public's health and the development of nations. The third edition of Nutrition and Health in Developing Countries takes on a new context where the word "developing" is now a verb and not an adjective.

This book starts at beginner level. The aim is to provide the reader complete understanding of foundations of electricity and radio electronics. These foundations are slowly built on and culminate at a solid advanced level. In this second edition some chapters have been expanded and whole new chapters added. The book is aimed at radio amateurs in any country as well as electrical and radio technicians. The book aims to provide clear understanding of radio and electrical concepts. The majority of the mathematics is typical of radio technician level. This book exceeds the standard prescribed by European Conference of Postal and Telecommunications (CEPT) TR61-01.

For the radio amateur. The Old Patriarch K3MT recollects a number of HF antenna topics. Many are about simple antennas made of ordinary wire. A few concern the effects of real dirt close to the antenna and how it reacts with the antenna's pattern. 8 x 10 format. 105 pages.

An extraordinary story of survival and alliance during World War II: the icy journey of four Allied ships crossing the Arctic to deliver much needed supplies to the Soviet war effort. On the fourth of July, 1942, four Allied ships traversing the Arctic split from their decimated convoy to head further north into the ice field of the North Pole. They were seeking safety from Nazi bombers and U-boats in the perilous white maze of ice floes, growlers, and giant bergs. Despite the many risks of their chosen route, the four vessels had a better chance of reaching their destination than the rest of the remains of convoy PQ-17. The convoy had started as a fleet of thirty-five cargo ships carrying \$1 billion worth of war supplies to the Soviet port of Archangel--the only help Roosevelt and Churchill had extended to Joseph Stalin to maintain their fragile alliance against Germany. At the most dangerous point of the voyage, the ships had received a startling order to scatter and had quickly become easy prey for the Nazis. The crews of the four ships focused on their mission. U.S. Navy Ensign Howard Carraway, aboard the SS Troubadour, was a farm boy from South Carolina and one of the many Americans for whom the convoy was a first taste of war; from the Royal Navy Reserve, Lt. Leo Gradwell was given command of the HMT Ayrshire, a British fishing trawler that had been converted into an antisubmarine vessel. The twenty-four-hour Arctic daylight in midsummer gave them no respite from bombers or submarines, and they all feared the giant German battleship Tirpitz, nicknamed the "Big Bad Wolf." Icebergs were as dangerous as Nazis as the remnants of convoy PQ-17 tried to slip through the Arctic to deliver their cargo in one of the most dramatic escapes of World War II. At Archangel they found a traumatized, starving city, and a disturbing preview of the Cold War ahead.
