Thorough detailing of how to use pressure point strikes for personal self-defense.

The martial arts world is rife with tales of ancient masters who could cause instant or delayed death or illness by attacking secret points on the human body. But to the Western mind, the concept of striking acupuncture points to disrupt the internal energy, or chi, seems like hocus-pocus. Thus, many serious martial artists dismiss the ancient art of dim-mak (also known as kyusho jitsu), which is literally translated as "death touch," as nothing more than fiction. However, if one can accept the idea that a dim-mak point is an avenue for attacking the nervous system, then it becomes easier to understand how striking specific points or groups of points can devastate the organs and the cardiovascular system. In this book, Dr. Michael Kelly, an osteopathic physician and experienced dim-mak practitioner, explains dim-mak's effects based on medical science. In layman's terms, Dr. Kelly reveals the physiological basis for what is clearly a very real and dangerous method of fighting. In the process of unraveling the mystery of this legendary art, Dr. Kelly makes the true genius of its founders brutally, and painfully, apparent.

Every action in martial arts and self defense aims at discovering the opponents weak points, exploiting them, and finally disabling him/her without injury or to bring him/her under control.

This comprehensive translation of the Bubushi—the ancient manual of karate—is the most complete available. Karate historian and authority Patrick McCarthy spent over ten years researching and studying the Bubushi and the arts associated with it. The English translation of this remarkable tome includes numerous explanations and notes. McCarthy's work also includes groundbreaking research on Okinawan and Chinese history, as well as the fighting and healing traditions that developed in those countries, making it a gold mine for researchers and practitioners alike. For the final word on the true origins and spirit of classic Okinawan martial arts, one need look no further. No other classic work has had as dramatic an impact on the shaping and development of karate as the Bubishi.

"Speak softly and carry a big stick". Many have heard this quote from former president Teddy Roosevelt. On the street, carrying a big stick is not enough. You must know how and have the will to use that big stick. This training manual will teach you how to use a stick. In Combative Martial Arts (CMA) weapons are divided into four categories: blunt, edged/pointed, flexible and projectile. The purpose of this training manual is to provide you with information on how to finish off an attacker when you are armed with a stick. Every self-defense practitioner must be familiar with streetwise weapons. While traditional weapons such as the sword or nunchakus may be interesting, it is highly unlikely that you will actually use them in an attack. The weapons of modern society include sticks, knives, chains and guns. These are the weapons that today's martial artist must become proficient in.

The purpose of this training manual is to provide you with concrete information and actions to improve your fighting spirit. Your fighting spirit or attitude is critical to your success. Many times comments are made about fighting spirit such as - "that person has great spirit", or "the fighting spirit is the most important factor to success", or "that person lacks fighting spirit". Since it is an intangible concept much confusion and mysticism exists. In reality it is a simple concept. This book will concretely define and provide actions to find, direct and improve your fighting spirit. Everyone has it and can develop it further. The mind, body and spirit are interconnected. This book will start with physical and mental components then move to the spiritual components. There are gray areas between the mind, body and spirit. This book will cover how I categorize and define them for my class. Do not get caught up in the categorization. The important thing is to find your fighting spirit, improve it, then put it to work for you. This book will be limited to fighting spirit. Other spiritual aspects of the martial arts will not be covered. In Combative Martial Arts (CMA) this material is focused on in the Application and early Personalization stage.

Treasured for centuries by karate's top masters, the Bubushi is a classic Chinese work on philosophy, strategy, medicine, and technique as they relate to the martial arts. Referred to as the "bible of karate" by famous master Chojun Miyagi, for hundreds of years the Bubishiw as a secret text passed from master to student in China and later in Okinawa. All of karate's legendary masters have studied it, applied its teachings, or copied passages from it. No other classic work has had as dramatic an impact on the shaping and development of karate as the Bubishi. Karate historian and authority Patrick McCarthy spent over ten years researching and studying the Bubishi and the arts associated with it. The first English translation of this remarkable martial arts manual includes numerous explanations and notes.
