I believe in signs, but we can only see the signs when we are aware of our questions or quest. I believe the outside world has too much influence in shaping our identities, and when we rely too heavily on external influences, we can lose our way. The truest answers to our most pressing questions often come from within, but sometimes our inner voice is the hardest one to hear. I began my journey for life's answers out of desperation to hear that voice. I was curious about the person I could become-if only I were brave enough to listen to my internal voice. I am a seeker of personal evolution and growth. The process which I call Life Letters developed out of a time when I didn't really know myself, when I felt both overwhelmed and underwhelmed by my own existence in the world. Life Letters gave-and continues to give me-the proper focus to explore different aspects of myself. Over three hundred letters and documents were recently discovered at the fort of Vindolanda, in Northern England, written on wooden tablets which have survived nearly 2,000 years. Painstakingly deciphered by Alan Bowman, the materials contribute a wealth of evidence for daily life in the Roman Empire. - Military documents testify to the lifestyle of officers and soldiers stationed at Vindolanda, and portraits of domestic life are included in letters between the officers' wives and a letter from home promising a solidier a package of socks. The engaging texts from thirty-four tablets provide insight into the similarities of daily existence in the Roman Empire and the present.

From the first ' deadly signs ' scratched on a wooden tablet instructing the recipient to kill the one who delivered it, to the letters of St Paul to the early Church, this book examines the range of letter writing in the Ancient Greek world. Containing extensive translated examples from both life and fiction, it provides a glimpse into the lives of both ordinary people and political life. This comprehensive study looks at personal and private letters, letters used in administration and government, letters used as vehicles for the dissemination of philosophy and religion, and letters which played a part in the development of several literary genres. The way in which letters were written and with what materials, how they were delivered, and how it is that, for certain limited periods and locations, so many of them have survived and how they were re-

discovered. By placing these letters in their social, political and intellectual contexts, *Life and Letters in the Ancient Greek World* draws attention to both familiar topics, such as young soldiers writing home from basic training and the choice of flowers for a wedding, and more alien events, such as getting rid of baby girls and offhand attitudes to bereavement. This first guide in English to provide commentary on such a broad range of letters, will be essential reading for anyone interested in the Ancient Greek World.

Hear the unheard voices that resonate with magnitude. *Life in Letters* tells the stories of young, nonspeaking individuals living with autism. As the sister of a nonspeaking autistic, Lia Assimakopoulos witnessed her brother William struggle with the communication barrier, which stymied their sibling relationship for years. After endless research and experimentation, it was a simple, laminated alphabet letterboard that opened up a new world of dialogue for them. By spelling his thoughts out letter by letter, William was able to finally express himself. His breakthrough inspired Assimakopoulos to seek out the stories of others who also spell as their primary form of communication. Using the experiences of other nonspeakers, she debates some of autism's most misunderstood yet important aspects, allowing the voices of each individual to shine through her writing. While autism presents various challenges each day, letterboards allow us to understand that autistics have a unique outlook on life and inspiring stories that deserve to be heard.

“ I mean to live and die by my own mind, ” Zora Neale Hurston told the writer Countee Cullen. Arriving in Harlem in 1925 with little more than a dollar to her name, Hurston rose to become one of the central figures of the Harlem Renaissance, only to die in obscurity. Not until the 1970s was she rediscovered by Alice Walker and other admirers. Although Hurston has entered the pantheon as one of the most influential American writers of the 20th century, the true nature of her personality has proven elusive. Now, a brilliant, complicated and utterly arresting woman emerges from this landmark book. Carla Kaplan, a noted Hurston scholar, has found hundreds of revealing, previously unpublished letters for this definitive collection; she also provides extensive and illuminating commentary on Hurston ’ s life and work, as well as an annotated glossary of the organizations and personalities that were important to it. From her enrollment at Baltimore ’ s Morgan Academy in 1917, to correspondence with Marjorie Kinnan Rawlings, Langston Hughes, Dorothy West and Alain Locke, to a final query letter to her publishers in 1959, Hurston ’ s spirited correspondence offers an invaluable portrait of a remarkable, irrepressible talent.

The first exhaustive treatment of the great monarch's letters opens the door to her life through her correspondence--from letters she wrote at ten to barely legible letters scrawled to her successor when she was on her deathbed. (Biography)

tended to shroud him in mystique, leading his followers to revere him as a saint and his detractors to dismiss him out of hand. As Irving Wardle says in his foreword to this edition (1986), David Magarshack's biography - first published in 1950 - offers 'a vigorous, highly readable narrative that succeeds in demystifying the working of the Moscow Art Theatre, and in removing Stanislavsky from his pedestal without cutting him down to size. To his autobiographical writings, Magarshack supplied the companion piece - A Life - and as such it remains un superseded.'
