AR: I was a postdoctoral fellow with Linus Pauling from 1949 to 1954. I worked on many different problems, but began to be interested in the nucleic acids towards the end of that period. Linus at that point had a flash of insight, erroneous it turned out, suggesting that DNA was a triple helix. He formulated that, published it quickly, and I think rapidly realized it was incorrect. At that ...

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

This book is about heroes. They are regular people like you and me who reacted with extraordinary courage in the face of great danger. They never planned to be heroes, but to have done otherwise would have been unthinkable to them. The first story is about a rough and tumble disaster relief worker who defies the bureaucracy and eludes death to help people who can't help themselves. The second story, narrated by an expatriate ecotourism guide, takes place in Honduras following the devastation wrought by Hurricane Mitch. He tells the story of a man who lost everything but his life and who risks that time and again to save a village isolated by the storm's destruction. The last story is about a professional football player who got into trouble with prescription drugs and lost everything. Then he found it again

thanks to a motor home dealership owner who takes in strays, perhaps to assuage his guilt about the life he once led. While his original intention was to get the girl, the ex-jock's reaction to the danger he faced sprang from a much deeper sense of right and wrong.

Sixth-grader Iris Abernathy hates life in Corvallis, Oregon, where her family just moved. It's always raining, and everything is so wet. Besides, nothing has felt right since Iris's best friend, Sarah, died. When Iris meets Boris, an awkward mouth-breather with a know-it-all personality, she's not looking to make a new friend, but it beats eating lunch alone. Then she learns that Boris's very existence is a medical mystery, maybe even a miracle, and Iris starts to wonder why some people get miracles and others don't. And if one miracle is possible, can another one be too? Can she possibly communicate with Sarah again?

This fully revised and expanded second edition brings together findings from research and clinical practice, with comprehensive coverage of the important aspects of physical health in persons with intellectual disability. Professionals involved in the medical and social care and support of persons with intellectual disability should have a broad understanding of the essential range of issues, and therefore this book provides a truly multi-disciplinary perspective, complete with many tables, figures, and illustrations to underline the key points. The reader is updated on ongoing developments in the general population, which will become increasingly more relevant to adults with intellectual disability. This book also acknowledges that the impact on the person and on their carers always needs to be taken into account, with treatment programs established with a multi-faceted team approach in mind. This book is aimed at an international audience of physicians and other allied health personnel concerned about the health and welfare of adults with intellectual disability. It should also be of interest to researchers, administrators, and senior program personnel engaged in this field.
