The Measures of Academic Progress (MAP) are computer-adaptive assessment tests produced by the Northwest Evaluation Association (NWEA). The tests are designed for kindergarten through 12th grade students, and assess reading, language usage, math, and, for some grades, general sciences. The test is untimed, but usually takes about an hour to complete.

Maps can show you where you are anywhere in the world! A beloved bestseller that helps children discover their place on the planet, now refreshed with new art from Qin Leng. Where are you? Where is your room? Where is your home? Where is your town? This playful introduction to maps shows children how easy it is to find where they live and how they fit in to the larger world. Filled with fun and adorable new illustrations by Qin Leng, this repackaged of Me on the Map will show readers how easy it is to find the places they know and love with help from a map.

Explains and demonstrates key mapping concepts, discussing the use of symbols, legends, a compass, scale, landmarks, and gridlines, along with instructions for making a map of a bedroom.

After learning about maps in school, Lisa maps all the favorite places of her dog Penny.

The Cat in the Hat introduces beginning readers to maps—the different kinds (city, state, world, topographic, temperature, terrain, etc.); their formats (flat, globe, atlas, puzzle); the tools we use to read them (symbols, scales, grids, compasses); and funny facts about the places they show us (Michigan looks like a scarf and a mitten! Louisiana looks like a chair you can sit in!).

Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade K provides an overview of all of the Kindergarten modules, including Numbers to 10; Two-Dimensional and Three-Dimensional Shapes; Comparison of Length, Weight, Capacity, and Numbers to 10; Number Pairs, Addition and Subtraction to 10; Numbers 10–20 and Counting to 10; and Analyzing Comparing and Composing Shapes.

Take a tour of Toronto, look around Lisbon or hot-foot it to Helsinki with this global adventure in a book! 30 best-loved cities from around the world are brought to life with illustrations by Martin Haake, which show in fabulous detail key landmarks, famous people, iconic buildings and cultural icons for all the family to enjoy. A search-and-find game on every page helps young readers to explore every city and spot the hundreds of details that makes each place unique.

In each spread of this bold and humorous picture book, available for the first time since 1995, children can examine their place in the world around them through detailed and engaging maps. Twelve beautifully illustrated maps such as Map of My Day and Map of My Tummy will fascinate children. When finished reading the book, children can unfold the jacket -- it turns into a poster-size map!

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. *Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms* is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

A fun-filled introduction to maps through the eyes of an adorable pig Henry is a very particular sort of pig. "A place for everything and everything in its place," he always says. But when he looks out his window he is troubled. The farm is a mess! Henry is worried that nobody will be able to find anything in this mess. So he draws a map showing all the animals exactly where they belong. And Henry embarks on a journey through the farm, his friends tagging along as he creates his map: sheep in the woolshed, chickens in the coop, the horse in the stable. After the map is complete, Henry uses it to bring himself back home, where he is relieved to know that he is exactly where he belongs. A place for everything and everything in its place, indeed. For fans of *Zen Shorts* by Jon J. Muth or of *Winnie the Pooh*, this sweet romp through the farm is adorably illustrated by David Elliot, who created the endearing animals who inhabit Brian Jacques world of *Redwall*. Perfect for pre-schoolers and elementary-schoolers learning to read maps for the first time. Praise for *Henry's Map*: *** "With appealing characters and gentle humor, this book will be a hit at storytime, or as an introduction to mapping lessons." "School Library Journal" *** (starred) *** "Here's hoping for many more Henry-centric adventures." "Kirkus Reviews" *** (starred) "Elliot's barnyard animals brim with personality and emotion, matching the understated humor of this charming story." "Publisher's Weekly" "This story may even inspire budding cartographers to map their own world." "Booklist"

Tours of six magical lands offer a map and directions for Peter Pan's Neverland, Dorothy's Land of Oz, the Giant's kingdom, Alice's Wonderland, Aladdin's Kingdom, and Snow White's Enchanted Forest, with hidden treasures to find in each one.
