This intensive management training programme is the first step to managing one of our UK restaurants. Over the course of six months, you'll learn our business from the ground up. That means hands-on experience of the kitchen, front counter, dining area and drive-thru ☺ as well as working breakfast, daytime, evening and overnight shifts, so you'll soon be an expert in every aspect of the ...

Many companies now recognize that learning through training, development, and knowledge management helps employees strengthen or increase their skills in order to improve or make new products, generate new and innovative ideas, and provide high-quality customer service. Thus, an emphasis on learning through training, development, and knowledge management is no longer in the category of (nice to do) they are a (must do) if companies want to gain a competitive advantage and meet employees' expectations. Based on the author's extensive experience in teaching training and development courses to both graduate and undergraduate students, Employee Training and Development, Seventh Edition, retains the lively writing style, inspiring examples, and emphasis on new technology and strategic training from previous editions.

The magazine that helps career moms balance their personal and professional lives.

Based on the popular Developing Leadership Talent program offered by the acclaimed Center for Creative Leadership, this important resource offers a nuts-and-bolts framework for putting in place a leadership development system that will attract and retain the best and brightest talent. Step by step, the authors explain how alignment with strategic goals and organizational purpose and effective developmental experiences are the backbone of a successful leadership program. An authoritative and useful book, Developing Leadership Talent is an essential tool for any leadership program.

Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

"He either enchants or antagonizes everyone he meets. But even his enemies agree there are three things Ray Kroc does damned well: sell hamburgers, make money, and tell stories." --from Grinding It Out Few entrepreneurs can claim to have radically changed the way we live, and Ray Kroc is one of them. His revolutions in food-service automation, franchising, shared national training, and advertising have earned him a place beside the men and women who have founded not only businesses, but entire empires. But even more interesting than Ray Kroc the business man is Ray Kroc the man. Not your typical self-made tycoon, Kroc was fifty-two years old when he opened his first franchise. In Grinding It Out, you'll meet the man behind McDonald's, one of the largest fast-food corporations in the world with over 32,000 stores around the globe. Irrepressible enthusiast, intuitive people person, and born storyteller, Kroc will fascinate and inspire you on every page.

Foodborne diseases takes a major toll on health. Thousands of millions of people fall ill and many die as a result of eating unsafe food. Deeply concerned by this a resolution was adopted by WHO and its Member States to recognize fod safety as an essential public health function and to develop a Global Strategy for reducing the burden of foodborne diseases.

Groundbreaking new research shows that by grabbing hold of the three-step "loop" all habits form in our brains--cue, routine, reward--we can change them, giving us the power to take control over our lives. "We are what we repeatedly do," said Aristotle. "Excellence, then, is not an act, but a habit." On the most basic level, a habit is a simple neurological loop: there is a cue (my mouth feels gross), a routine (hello, Crest), and a reward (ahhh, minty fresh). Understanding this loop is the key to exercising regularly or becoming more productive at work or tapping into reserves of creativity. Marketers, too, are learning how to exploit these loops to boost sales; CEOs and coaches are using them to change how employees work and athletes compete. As this book shows, tweaking even one habit, as long as it's the right one, can have staggering effects. In The Power of Habit, award-winning New York Times business reporter Charles Duhigg takes readers inside labs where brain scans record habits as they flourish and die; classrooms in which students learn to boost their willpower; and boardrooms where executives dream up products that tug on our deepest habitual urges. Full of compelling narratives that will appeal to fans of Michael Lewis, Jonah Lehrer, and Chip and Dan Heath, The Power of Habit contains an exhilarating argument: our most basic actions are not the product of well-considered decision making, but of habits we often do not realize exist. By harnessing this new science, we can transform our lives.

By focusing on what students learn rather than what they are taught, schools can redefine their mission and begin the transition to a professional learning community. After interviewing and observing principals, administrators, and teachers, the authors identify seven leadership practices that effective PLC leaders share, along with the techniques that have led them to sustainable success.
