An encyclopedia designed especially to meet the needs of elementary, junior high, and high school students.

"This book, about ballet and beauty, philosophy and family, reinforces Amy Fusselman's status as one of our best interrogators of how we live now." —Dave Eggers Leaping from ballet to quilt making, from The Nutcracker to an Annie-B Parson interview, Idiophone is a strikingly original meditation on risk-taking and provocation in art and a unabashedly honest, funny, and intimate consideration of art-making in the context of motherhood, and motherhood in the context of addiction. Amy Fusselman's compact, beautifully digressive essay feels both surprising and effortless, fueled by broad-ranging curiosity, and, fundamentally, joy. "Fusselman bounds with great dexterity from theme to theme—covering topics including addiction, motherhood, gender, and art—until she has transformed the traditional essay into something far wilder and more alive." —Publishers Weekly, starred review "No one acrobats between beauty, confession, rueful humor, and deep insight with such amazing trapeze-y ease as Amy Fusselman." —John Hodgman

An illustrated reference guide to the history of modern architecture in Montgomery County, Maryland, from 1930 to 1979, with an inventory of key buildings and communities, and biographical sketches of practitioners including architects, landscape architects, planners and developers.

Legendary nature photographer Thomas D. Mangelsen selects his most recognized and widely collected limited-edition images reflecting the beauty of the Earth's most iconic wildlife. This stunning, large-format volume contains more than 100 images captured from Mangelsen's last 25 years of photographic adventures around the world. This remarkable collection features more than 100 of Mangelsen's most loved and sought after limited-edition images. These spectacular images take viewers on a visual journey from polar bears in the Arctic to vast herds of game on the plains of Africa, from the deep jungles of South America to the tigers of India, from images revealing the diversity of wildlife in the American West to even more. Mangelsen has captured rare moments and vast panoramas from all seven continents.

California offers an incredible diversity of world-class landscapes to explore. Within its 163,700 square miles lie the lowest and highest points in the continental United States, the hottest place on earth, and the oldest life on the planet: Bristlecone pines up to 4,600 years old. Whether your camera is a smartphone or the latest DSLR, this book can help you find the most interesting places. Capturing memorable images just got a lot easier! Whether your interest is mountains or seashores, slot canyons or salt flats, waterfalls, rock formations, sand dunes, lighthouses or historic mining camps, the book will direct you to the best landmarks, at the time when the light is best. The author has done the hard work for you, revealing the best photo hot-spots and saving you the frustration of searching for them yourself.

To coincide with the 2016 centennial anniversary of the National Parks Service, the Creative Action Network has partnered with the National Parks Conservation Association to revive and reimagine the legacy of WPA travel posters. Artists from all over the world have participated in the creation of this new, crowdsourced collection of See America posters for a modern era. Featuring artwork for 75 national parks and monuments across all 50 states, this engaging ebook celebrates the full range of our nation's landmarks and treasured wilderness.

This book formalizes and analyzes the relations between multiple views of a scene from the perspective of various types of geometries. A key feature is that it considers Euclidean and affine geometries as special cases of projective geometry. Over the last forty years, researchers have made great strides in elucidating the laws of image formation, processing, and understanding by animals, humans, and machines. This book describes the state of knowledge in one subarea of vision, the geometric laws that relate different views of a scene. Geometry, one of the oldest branches of mathematics, is the natural language for describing three-dimensional shapes and spatial relations. Projective geometry, the geometry that best models image formation, provides a unified framework for thinking about many geometric problems relevant to vision. The book formalizes and analyzes the relations between multiple views of a scene from the perspective of various types of geometries. A key feature is that it considers Euclidean and affine geometries as special cases of projective geometry. Images play a prominent role in computer communications. Producers and users of images, in particular three-dimensional images, require a framework for stating and solving problems. The book offers a number of conceptual tools and theoretical results useful for the design of machine vision algorithms. It also illustrates these tools and results with many examples of real applications.

Named a Best Art Book of 2017 by the New York Times and Artforum In South of Pico Kellie Jones explores how the artists in Los Angeles's black communities during the 1960s and 1970s created a vibrant, productive, and engaged activist arts scene in the face of structural racism. Emphasizing the importance of African American migration, as well as L.A.'s housing and employment politics, Jones shows how the work of black Angeleno artists such as Betye Saar, Charles White, Noah Purifoy, and Senga Nengudi spoke to the dislocation of migration, L.A.'s urban renewal, and restrictions on black mobility. Jones characterizes their works as modern migration narratives that look to the past to consider real and imagined futures. She also attends to these artists' relationships with gallery and museum culture and the establishment of black-owned arts spaces. With South of Pico, Jones expands the understanding of the histories of black arts and creativity in Los Angeles and beyond.
