This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader ' s thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied

From the people who turned teacher education on its ear in Australia in 2001 comes a text about preparing the next generation of teachers. Richard Smith and David Lynch, two of Australia's leading teacher education researchers and the architects of the acclaimed Bachelor of Learning Management program (BLM), take their previously published ideas about teaching and teacher education further to detail a new paradigm in the preparation of teachers. Drawing on 30 years of teacher education research and their own experiences in redeveloping teacher

education in Australia, Smith and Lynch explore what it means to be a teacher in the 2000s, outlining a new vision for the preparation of teachers in a Knowledge Age.

This fresh new text introduces IB from a truly global and contemporary perspective. Packed with case studies drawn from an impressive spectrum of countries, International Business enables students to link theory with practice and encourages critical thinking. Particular emphasis is placed on key issues such as the growing role of SMEs and entrepreneurship in IB, ethics, CSR, corporate governance and global warming.

context. The Architecture Sourcebook is different. It's not a how-to book, it's a 'what and why' book. And because it names names as it unwinds the design decisions which have shaped the OS, it is also a 'who' book. It will show where the OS came from, how it has evolved to be what it is, and provide a simple model for understanding what it is, how it is put together, and how to interface to it and work with it. It will also show why design decision were made, and will bring those decisions to life in the words of Symbian's key architects and developers, giving an insider feel to the book as it weaves the "inside story" around the architectural presentation. The book will describe the OS architecture in terms of the Symbian system model. It will show how the model breaks down the system into parts, what role the

parts play in the system, how the parts are architected, what motivates their design, and how the design has evolved through the different releases of the system. Key system concepts will be described; design patterns will be explored and related to those from other operating systems. The unique features of Symbian OS will be highlighted and their motivation and evolution traced and described. The book will include a substantial reference section itemising the OS and its toolkit at component level and providing a reference entry for each component.
