This volume is the 18th in a series of monographs on service learning and the academic disciplines. The articles in this volume provide an array of service learning courses in biology that demonstrate active student participation in thoughtfully organized service experiences that meet real community needs and are integrated with the students' academic curriculum. The articles are: (1) "Educational Benefits Associated with Service-Learning Projects in Biology Curricula" (John C. Kennell); (2) "An Environmental Science Approach to Service-Learning in Biology" (Jeffrey A. Simmons); (3) "Service-Learning in Botany: A Public School Project" (Nancy K. Prentiss); (4) "Service Stimulates Science Learning in At-Risk Kids: The Millikin Model" (Marianne Robertson); (5) "Virginia STEP: Evidence That Service-Learning Can Enhance a College Biology Program" (Alan Raflo); (6) "Service-Learning in Biology: Providing a College Experience for High School Students" (Scott S. Kinnes); (7) "Expanding the Reach of University Courses in Biology and Health To Provide Meaningful Service to Underserved Communities" (Amal Abu-Shakra and Tun Kyaw Nyein); (8) "Community and Environmental Compatibility in the York River Watershed: A Project-Based Interdisciplinary Service-Learning Course" (A. Christine Brown and Samuel A. McReynolds); (9) "Service-Learning in Biology: Using the Internet and Desktop Videoconferencing" (Paul D. Austin); (10) "Service-Learning in the Natural Sciences: North Seattle Community College" (Peter Lortz); (11) "Service-Learning and Field Biology in Postcolonial Perspective: The Bahamas Environmental Research Center as a Case Study" (Luther Brown); and (12) "Biology and Service-Learning: Logical Links" (Joel H. Ostroff and David C. Brubaker). An appendix contains reprints from "Science and Society: Redefining the Relationship," 1996 Campus Compact; summary course descriptions, suggested readings, and a list of contributors. Each paper contains references. (SLD)

conventions for describing soils. Intended to be both current and usable by the entire soil science community."

This study was conducted to determine whether conventional secondary biological treatment detoxifies sulphite pulp mill effluents. Seven sulphite pulp mills, varying in pulping base, wood species, type of treatment and recovery system and geographical location were studied. All mills were located in the United States and practiced some form of chemical recovery and biological treatment (aerated lagoons or activated sludge). Samples of mill effluents before and after biological treatment were collected four times over six months. Standard 96-hour static bioassays using rainbow trout (*Salmo gairdneri*) determined the LC50 value of each sample. Acute lethality was defined by a compliance standard of LC50=100%. Other routine analyses such as pH, biochemical and chemical oxygen demand, ammonia and total suspended solids were also conducted.

Wireless Foresight deals with the development of the wireless communications industry and technology during the coming ten to fifteen years. Telecommunications is a global business of enormous proportions and is one of the largest industries in the world. Written in a highly accessible and simple to read manner, this book is based around four scenarios of the wireless world in 2015. The focus is on the industry (i.e. infrastructure and terminal vendors, operators, and service developers and providers) as well as on new players. Discusses the long-term developments described in the four scenarios and also short term issues, for example the challenges facing industry. Uncovers important areas for technological research and discusses the critical challenges facing industry, for example; the high cost for infrastructure, the slow spectrum release, the stampeding system complexity, radiation, battery capacity, and the threat of a disruptive market change facing the telecommunications industry. Offers a global approach whereby developments from around the world are described. Employs the method of building full-scale scenarios as opposed to just identifying trends and making predictions. Wireless Foresight is an invaluable and provocative read for top and middle management, strategists, business developers, technology managers, and entrepreneurs in the telecom, datacom and infocom industries alike. It is also of great interest to financial analysts and academics.
