Protective Relay School Webinar Series Learn from the comfort of your home with the ABB Grid Automation Webinar Series. Ask questions and hear from leading authorities with expertise across power systems. Featuring the tenth season of the Protective Relay School, each webinar is specifically designed to provide a strong foundation and fundamental principles.~~

ABB 2020 Grid Automation Webinar Series

2019 Protective Relay School Webinar Series. Free protection and control fundamentals training sessions provide you with valuable information that can be utilized immediately. The sessions can also be applied towards personal development hour credits for PE licensing. Now in its ninth season, the ABB Protective Relay School webinar series is coming to a computer near you.

2019 Protective Relay School Webinar Series

ABB Grid Automation webinar series Featuring the Protective Relay School This series of webinars focuses on the core elements of protection & control. Learn from leading authorities in power systems as you dive into the digital transformation of protection and control using modern devices and systems to provide data to higher

Announcing the new ABB Grid Automation webinar series ...

This webinar brought to you by the Relion product family Advanced protection and control IEDs from ABB. Relion. Thinking beyond the box. Designed to seamlessly consolidate functions, Relion relays are smarter, more flexible and more adaptable. Easy to integrate and with an extensive function library, the Relion family of protection and control delivers advanced functionality and improved performance.

This webinar brought to you by the Relion product family ...

Protective relay school webinar series | North America English language series. Fall 2011-Winter 2012. Delivering an efficient overview of key protection and control topics, these 90 minute free educational sessions will provide you with valuable information you can put to use immediately. The highly regarded ABB Protective Relay School is coming to a computer near you.

The ABB Protective Relay School webinar series is free to industry professionals and will run from June 18, 2013 to February 2014. To view the webinar calendar, course descriptions and to register, visit <http://bit.ly/19lAGdY> .

ABB in North America Releases Protective Relay School ...

ABB in North America announces Protective Relay School 2011 webinar series 2011-07-14 - Delivering an efficient overview of key protection and control topics, these 90 minute free educational sessions will provide you with valuable information you can put to use immediately.

ABB in North America announces Protective Relay School ...

ABB has released the schedule for the 2013 Protective Relay School webinar series. Now in its third season, this webinar series has become a trusted instructional resource for literally thousands of industry practitioners.These educational 90 minute sessions are presented live by subject matter experts and encourage interaction between the instructor and participants.

The "E-Learning Methodologies" guide will support professionals involved in the design and development of e-learning projects and products. The guide reviews the basic concepts of e-learning with a focus on adult learning, and introduces the various activities and roles involved in an e-learning project. The guide covers methodologies and tips for creating interactive content and for facilitating online learning, as well as some of the technologies used to create and deliver e-learning.

Today's children and adolescents are constantly facing new and unique challenges, and school counselors must respond to this by expanding their role and function within the schools. This revised and expanded edition of Thompson's important text explores these issues, as well as the necessary steps school counselors need to take in order to adapt and effectively deal with them. Thompson advocates for the need for standards-based school counseling, outlining the framework and benefits of the ASCA National Model® and comprehensive guidance and counseling programs. She addresses the newest research in implementing evidence-based practices; the mental health issues that may be faced by children and adolescents; consulting with teachers, parents, administrators, and the community; and crisis intervention and management. New to this edition are chapters that focus on minority and disenfranchised students and emphasize the need for school counselors to be able to advocate, coordinate, and collaborate on services for these students and their families. This is an essential resource for every school counselor in a time when the profession is becoming increasingly important.

Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

The Gap Between Weather and Climate Forecasting: Sub-seasonal to Seasonal Prediction is an ideal reference for researchers and practitioners across the range of disciplines involved in the science, modeling, forecasting and application of this new frontier in sub-seasonal to seasonal (S2S) prediction. It provides an accessible, yet rigorous, introduction to the scientific principles and sources of predictability through the unique challenges of numerical simulation and forecasting with state-of-science modeling codes and supercomputers. Additional coverage includes the prospects for developing applications to trigger early action decisions to lessen weather catastrophes, minimize costly damage, and optimize operator decisions. The book consists of a set of contributed chapters solicited from experts and leaders in the fields of S2S predictability science, numerical modeling, operational forecasting, and developing application sectors. The introduction and conclusion, written by the co-editors, provides historical perspective, unique synthesis and prospects, and emerging opportunities in this exciting, complex and interdisciplinary field. Contains contributed chapters from leaders and experts in sub-seasonal to seasonal science, forecasting and applications Provides a one-stop shop for graduate students, academic and applied researchers, and practitioners in an emerging and interdisciplinary field Offers a synthesis of the state of S2S science through the use of concrete examples, enabling potential users of S2S forecasts to quickly grasp the potential for application in their own decision-making Includes a broad set of topics, illustrated with graphic examples, that highlight interdisciplinary linkages

Far too often, our students attain only a superficial level of knowledge that fails to prepare them for deeper challenges in school and beyond. In Teaching for Deeper Learning, renowned educators and best-selling authors Jay McTighe and Harvey F. Silver propose a solution: teaching students to make meaning for themselves. Contending that the ability to "earn" understanding will equip students to thrive in school, at work, and in life, the authors highlight seven higher-order thinking skills that facilitate students' acquisition of information for greater retention, retrieval, and transfer. These skills, which cut across content areas and grade levels and are deeply embedded in current academic standards, separate high achievers from their low-performing peers. Drawing on their deep well of research and experience, the authors - Explore what kind of content is worth having students make meaning about. - Provide practical tools and strategies to help teachers target each of the seven thinking skills in the classroom. - Explain how teachers can incorporate the thinking skills and tools into lesson and unit design. - Show how teachers can build students' capacity to use the strategies independently. If our goal is to prepare students to meet the rigorous demands of school, college, and career, then we must foster their ability to respond to such challenges. This comprehensive, practical guide will enable teachers to engage students in the kind of learning that yields enduring understanding and valuable skills that they can use throughout their lives.

Effective teaching is effective teaching, no matter where it occurs The pandemic teaching of mid-2020 was not really distance learning, but rather crisis teaching. But starting now, teachers have the opportunity to prepare for distance learning with purpose and intent,using what works best to accelerate students' learning all the while maintaining an indelible focus on equity. Harnessing the insights and experience of renowned educators Douglas Fisher, Nancy Frey, and John Hattie, The Distance Learning Playbook applies the wisdom and evidence of VISIBLE LEARNING® research to understand what works best with distance learning. Spanning topics from teacher-student relationships, teacher credibility and clarity, instructional design, assessments, and grading, this comprehensive playbook details the research- and evidence-based strategies teachers can mobilize to deliver high- impact learning in an online, virtual, and distributed environment. This powerful guide includes: - Learning Intentions and Success Criteria for each module to track your own learning and model evidence-based teacher practices for meaningful learning - A diversity of instructional approaches, including direct instruction, peer learning, and independent work that foster student self-regulation and move learning to deep and transfer levels - Discussion of equity challenges associated with distance learning, along with examples of how teachers can work to ensure that equity gains that have been realized are not lost. -Special guidance for teachers of young children who are learning from a distance - Videos of the authors and teachers discussing a wide variety of distance learning topics - Space to write and reflect on current practices and plan future instruction The Distance Learning Playbook is the essential hands-on guide to preparing and delivering distance learning experiences that are truly effective and impactful.

Hauer offers hope and practical coping strategies in equal measure.

Research Regulatory Compliance offers the latest information on regulations and compliance in the laboratory. With the increasing complexity of regulations and need for institutional infrastructure to deal with compliance of animal use issues, as well as a requirement surrounding human subjects, this publication provides reputable guidance and information. The book is extremely helpful as a resource for researchers, administrators, and technicians in the laboratory, and is also a great asset for faculty or new researchers coming in to the laboratory environment. It will help prepare users for the deluge of regulatory and compliance issues they will face while conducting their scientific programs. The book is edited and authored by known leaders in the field of compliance and regulations, and contains extensive research on the topics. It represents the new standard for information in every laboratory. Provides a "lone-stop" , go-to resource for the many regulatory and compliance issues that affect laboratory study and research models Extremely helpful as a resource for researchers, administrators, and technicians in the laboratory, and also a great asset for faculty or new researchers coming in to the laboratory environment Focuses on United States regulations, covering both animal models and human subjects Written and edited by known leaders in the field of regulatory compliance who bring many years of collective experience to the book
