This fully-updated third edition of Teaching Mathematics using ICT incorporates all the most recent developments in mathematics education, including the new National Curriculum and recent Ofsted maths report. The authors also bring the hardware and software sections of the book right up to date, as well as telling you where to find all the best free resources! The book reflects the shift in focus to personalized learning and cross-curricular approaches,

and suggested answers to the reflective questions peppered throughout the text are featured on the book's dedicated website. This user-friendly book is the definitive guide to using ICT to teach mathematics, and will be a valuable resource for all secondary school maths teachers and trainees.

"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Vols. for 1903- include Proceedings of the American Physical Society.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface.
