To love in a language prised from my wishbone. To sing a landscape where village girls burst the moon with giggles. To dance through the fattest eye of a rice-grain -- to do all these in peace and war is the wish embodied in Merlinda Bobis' poetry. From her epic poem 'Cantala of the Warrior Woman Daragang Magayon' to lyric reflections on longing, and finally to an erotic poetry-dance-drama, Bobis traces the cartography of desire and its intimacy with death.

This book differs from other thermodynamics texts in its objective which is to provide engineers with the concepts, tools, and experience needed to solve practical real-world energy problems. The presentation integrates computer tools (e.g., EES) with thermodynamic concepts to allow engineering students and practising engineers to solve problems they would otherwise not be able to solve. The use of examples, solved and explained in detail, and supported with property diagrams that are drawn to scale, is ubiquitous in this textbook. The examples are not trivial, drill problems, but rather complex and timely real world problems that are of interest by

themselves. As with the presentation, the solutions to these examples are complete and do not skip steps. Similarly the book includes numerous end of chapter problems, both typeset and online. Most of these problems are more detailed than those found in other thermodynamics textbooks. The supplements include complete solutions to all exercises, software downloads, and additional content on selected topics. These are available at the book web site www.cambridge.org/KleinandNellis.

Atlas of Impossible Longing, Anuradha Roy's exquisite storytelling instantly won readers' hearts around the world, and the novel was named one of the best books of the year by The Washington Post and The Seattle Times. Now, Roy has returned with another masterpiece that is already earning international prize attention, an evocative and deeply moving tale of a young woman making a new life for herself amid the foothills of the Himalaya. Desperate to leave a private tragedy behind, Maya abandons herself to the rhythms of the little village, where people coexist peacefully with nature. But all is not as it seems, and she soon learns that no refuge is remote enough to keep out the modern world. When power-hungry

politicians threaten her beloved mountain community, Maya finds herself caught between the life she left behind and the new home she is determined to protect. Elegiac, witty, and profound by turns, and with a tender love story at its core, *The Folded Earth* brims with the same genius and love of language that made *An Atlas of Impossible Longing* an international success and confirms Anuradha Roy as a major new literary talent.

For the past hundred years, much has been written about the early editions of Christian texts discovered in the region that was once Roman Egypt. Scholars have cited these papyrus manuscripts--containing the

Bible and other Christian works--as evidence of Christianity's presence in that historic area during the first three centuries AD. In *Early Christian Books in Egypt*, distinguished papyrologist Roger Bagnall shows that a great deal of this discussion and scholarship has been misdirected, biased, and at odds with the realities of the ancient world. Providing a detailed picture of the social, economic, and intellectual climate in which these manuscripts were written and circulated, he reveals that the number of Christian books from this period is likely fewer than previously believed. Bagnall explains why papyrus manuscripts have routinely been dated too early, how the role of Christians in the history of the codex has been

misrepresented, and how the place of books in ancient society has been misunderstood. The author offers a realistic reappraisal of the number of Christians in Egypt during early Christianity, and provides a thorough picture of the economics of book production during the period in order to determine the number of Christian papyri likely to have existed. Supporting a more conservative approach to dating surviving papyri, Bagnall examines the dramatic consequences of these findings for the historical understanding of the Christian church in Egypt.

efficiencies. It gives packaging designers, manufacturers, suppliers and buyers new tools for understanding how their respective contribution to packaging development can be more effectively leveraged by understanding in practical terms how each fits within an extended set of people and groups adding value to a package. Using case studies from the packaging industry, the book reveals how value chain thinking solves technical and business problems. Here packaging specialists will find specific recommendations on contracts, innovation and knowledge management that will help them reduce costs, meet environmental regulations, and develop better products.
