Francis Lyall and Paul B. Larsen have been involved in teaching and researching space law for over 50 years. This new edition of their well-received text gathers together their knowledge and experience in readable form, and covers developments in all space applications, including space tourism, telecommunications, the ITU and finance. With an extensive citation of the literature, the discussion provides an excellent source for both students and practitioners.

The United Nations currently has five effective international space treaties, namely the Outer Space Treaty of 1967, Space Rescue Agreement of 1968, Space Liability Convention of 1972, Space Registration Convention of 1975, and Moon Agreement of 1979. However, with recent competition and movements to mine and exploit natural resources from such entities as the moon, asteroids, etc., these outdated treaties no longer address current advancements. It is imperative that new research is undertaken to urge and progress new space laws and policies that strengthen international cooperation and joint undertakings into the exploitation of natural resources from

outer space. *Global Issues Surrounding Outer Space Law and Policy* grants a general understanding for the current issues and methods of solution in the field of outer space law and policy in the global society. It suggests a revision of the five international space treaties and presents a new International Space Agency (ISA) that would use international cooperation and an International Court of Air and Space Law to promote the speed of work and fairness in trials of air and space law cases. Additionally, solutions for the cooperation of the global community towards joint undertakings and exploitation of natural resources in celestial bodies is explored. This book is ideal for lawyers, professors, government officials, space agencies, academicians, researchers, students, and anyone looking to understand the complicated problems and methods of solution in international space law and policy.

A collection of original essays developing a Confucian political and legal theory, focusing on South Korea, traditionally the most Confucian East Asian country in its legal, political, and cultural practices.

Proceedings of the International Conference on Air and Space Policy, Law, and Industry for the 21st Century, held in Seoul from 23-25 June 1997.

This work explores the tension in East Asia between the trend towards a convergence of legal practices in the direction of a universal model and a reassertion of local cultural practices. The trend towards convergence arises in part from 'globalisation', from 'rule of law programs' promulgated by institutions such as the International Monetary Fund and the

Asian Development Bank, and from widespread migration in the region, whilst the opposing trend arises in part from moves to resist such 'globalisation'. This book explores a wide range of issues related to this key problem, covering China in particular, where resolving differences in conceptions about the rule of law is a key issue as China begins to integrate itself into the World Trade Organisation regime.

Fundamentals of International Aviation Law and Policy offers students a systematic, tailored and dynamic approach to understanding the legal scenario concerning international civil aviation. The book dynamically covers the major areas of international aviation law, and provides an introduction to the multifaceted international regulation of aviation activities in the sphere of public and private law. The book is designed to provide the reader with the fundamental notions concerning international aviation law. It adopts an interactive approach, which aims at engaging the reader by way of using learning tools. The main areas of public and private aviation law are dealt with from a regulatory and practical perspective, and include detailed analyses of existing and applicable legislations, as well as landmark court cases and decisions. Each chapter is tailored to confer to readers a thorough knowledge of the international and, if any, the European applicable legislation. Delivery of these aims is attained through a dynamic and balanced use of didactic instruments and immediate information. The book is intended for a varied audience of students and professionals involved in the aviation world, without requiring the possession of specific legal knowledge or background. It also aims to constitute a useful reference material for those who are familiar with legal terminology and aviation specifics.

The most comprehensive and easy-to-read reference on the market today. Now used by thousands of human resources executives, in-house counsel, business owners and employment lawyers across the United States, this comprehensive guide addresses the latest legal rules and best practices to avoid liability in the California workplace. Comes complete with the latest California forms, checklists and compliance tools. For recent changes to the law, go to www.EmploymentLawPublishers.com for free legal updates between editions with your purchase.

The world of aviation has moved on rapidly since the appearance of the ninth edition of this pre-eminent resource five years ago. Those developments pertain to market access and market behaviour by air carriers, including competition, new perceptions of safety and security, among others in relation to transparency of accident investigation and cybersecurity, case law in the area of airline liability, with new cases from the United States, product liability and insurance, the United Kingdom, and elsewhere, the growing importance of environmental concerns, the rights and obligations of passengers, also in the context of 'unruly' passengers, and innovative methods for financing aircraft. Special attention has been paid in this edition to regional integration movements, especially in Europe, affecting the mentioned subjects. The book's extensive references to other sources in the field have been expanded and updated by the author and experts in specialised areas. The present edition addresses the following topics: - the regulatory framework governing the operation of air services including the principle of sovereignty in national airspace; - the distinction between State and civil aircraft; - dispute settlement in international civil aviation; - economic regulation of international air transport services including the establishment of air services

agreements; - inter-airline cooperation in the context of competition law regimes; - liability of the various service providers, in particular airlines, and related insurance coverage; - the promotion of safety standards; - criminal acts affecting the safety of aviation; - the role of international and regional organisations with particular reference to that of the European Union; - liability of the aircraft manufacturer for equipment; and - financial and security interests in mobile equipment. The many practitioners, officials, business people, and academics with a professional interest in aviation law will appreciate this new edition as one of the fundamental works in the field, and newcomers will discover an incomparable resource. This tenth edition is ready to be of unmatched service to any practising member of the air law community anywhere in the world.

How and why has the Korean state changed its way of handling the society and its markets over the past two decades? The Changing Role of the Korean State finds that the explosion of contentious civil society after democratization coeval with the outbreak of the financial crisis following rapid economic growth, are closely associated with the decline of developmentalism. Despite these profound changes, however, the Korean state has not totally relinquished its control over the society and the market. Rather, although its methods have been altered it remains to be highly interventionist and regulatory in nature. The state continues to use its influence to restructure the socio-economic system and rationally manage spatial arrangements. The book amply demonstrates the residual legacy of the developmental state in Korea, and it is unlikely that Korea will ever accept the western liberalist concept of a state which limits its function to that of a referee for the spontaneous operation of the civil society and the market. The contributors of this edited volume

delineate the shifting role of the Korean state from the developmental state, which led economic development by guiding investment in strategic industries through various means, to a slightly subtler role as a regulator, supervising the operation of the market in the changing economic environment. Individual chapters presented here address this changing but nonetheless vital role that the state plays in managing the variety of modern socio-economic life in South Korea. Hong Yung Lee is Professor Emeritus of Political Science at University of California, Berkeley. Sunil Kim is Assistant Professor of International Studies at Kyung Hee University.
