In the movement toward standards-based education, an important question stands out: How will this reform affect the 10% of school-aged children who have disabilities and thus qualify for special education? In Educating One and All, an expert committee addresses how to reconcile common learning for all students with individualized education for "one"--the unique student. The book makes recommendations to states and communities that have adopted standards-based reform and that seek policies and practices to make reform consistent with the requirements of special education. The committee explores the ideas, implementation issues, and legislative initiatives behind the tradition of special education for people with disabilities. It investigates the policy and practice implications of the current reform movement toward high educational standards for all students. Educating One and All examines the curricula and expected outcomes of standards-based education and the educational experience of students with disabilities--and identifies points of alignment between the two areas. The volume documents the diverse population of students with disabilities and their school experiences. Because approaches to assessment and accountability are key to standards-based reforms, the committee analyzes how assessment systems currently address students with disabilities, including testing accommodations. The book addresses legal and resource implications, as well as parental participation in children's education.

Practical understanding and realistic curricular adaptations for ensuring the successful inclusion of students with special needs, ages three to eight Adapting Early Childhood Curricula for Children with Disabilities and Special Needs uses a developmental focus, rather than a disability orientation, to discuss typical and atypical child development and curricular adaptations. The integrated, non-categorical approach assumes that children are more alike than different in their development. The inclusive focus assumes that attitudes, environments, and intervention strategies can be adapted so that all young children with disabilities or other special needs can be included. An essential text for today, and a valuable resource to take into the classroom tomorrow, this practical guide provides daily activities, evidence-based how-to strategies, and realistic lesson modifications that help facilitate truly inclusive classrooms. Aspiring educators will also learn to develop their collaboration and problem-solving skills to effectively work with families, colleagues, and paraprofessionals in supporting every child's positive development. The 10th Edition is updated to include enhanced discussions on working with families, children, and professionals of diverse cultural and linguistic backgrounds and lifestyles; new tips for integrating Division for Early Childhood Recommended Practices; updated requirements for writing IEP goals and recommendations; and more.
