painstaking analysis, and a supple clarity of writing.” —Jean Baker “ My husband considered you a dear friend, ” Mary Todd Lincoln wrote to Frederick Douglass in the weeks after Lincoln ’ s assassination. The frontier lawyer and the former slave, the cautious politician and the fiery reformer, the President and the most famous black man in America—their lives traced different paths that finally met in the bloody landscape of secession, Civil War, and emancipation. Opponents at first, they gradually became allies, each influenced by and attracted to the other. Their three meetings in the White House signaled a profound shift in the direction of the Civil War, and in the fate of the United States. James Oakes has written a masterful narrative history, bringing two iconic figures to life and shedding new

The patrol vehicles used by Special Operations Forces in Afghanistan and Iraq vary quite dramatically between the theatres as well as amongst the Coalition members, and have been developed and upgraded to meet the demands of the deployment. Covering all the major Coalition nations, Leigh Neville continues his look at the elite forces deployed in Operations Enduring Freedom and Iraqi Freedom, with this analysis of their vehicles. Tracing the evolution of the vehicle types, from their historical precedents, through their designs

to their operational developments, he discusses their advantages and disadvantages, along with their tactical employment. From the mine-protected vehicles used to counter the IED threat in Iraq, the use of Strykers as armoured raiding platforms by the US Rangers, to the civilian vehicles adapted for military service by both Coalition troops and Private Military Contractors in the regions, this book uses rare in-theatre photographs and colour artwork to show the variety and inventiveness of the patrol vehicles being used in combat today.

This volume represents an effort to bring together communities of land-based hydrogeology and marine hydrogeology. The issues of submarine groundwater discharge and its opposite phenomenon of seawater invasion are discussed in this book from the geophysical, geochemical, biological, and engineering perspectives. This is where land hydrogeology and marine hydrogeology overlap. Submarine groundwater discharge is a rapidly developing

research field. The SCOR and LOICZ of the IGBP have recently established a working group for this research. IASPO and IAHS under IUGG also recently formed a new joint committee "Seawater/Groundwater Interactions" to collaborate with oceanographers and hydrologists. The other articles introduce frontier research topics in more typical land and marine environments, such as fluid flow in karst aquifers, the biological aspects of fluids in sedimentary basins and submarine sedimentary formations, respectively, and vigorous fluid flow in subsea formations and their significance in global tectonics. Geochemical characteristics of hydrothermal activities at a number of active continental margins are also reviewed, and multidisciplinary geophysical constraints of the permeability of young igneous oceanic

Man-about-town and NYC men's style fixture Matt Hranek is back with his second book, *A Man & His Car*. Here is a beautiful homage to an object of men's obsession, told in firsthand and original interviews. Jay Leno, a major car collector and the host of *Jay Leno's Garage*, shares the story of his oldest car, a 1955 Buick Roadmaster that he bought for \$350, which he literally slept in before getting his break in L.A. Kevin Costner reveals that he got so attached to the iconic Shelby Mustang he drove in the movie *Bull*

Durham, he bought it for his own personal collection. Franz von Holzhausen, chief designer at Tesla, who worked hand in hand with Elon Musk to design the Tesla Model S prototype, says that his love of cars started when he was two (as evidenced by a picture of him sitting in a high chair drawing a car). And as for Snoop Dogg and his 1965 Cadillac “ Snoop DeVille ” convertible—do we even need to explain? A Man & His Car includes visits to some of the most exclusive collections in the world—from that of the Petersen Automotive Museum to those of car manufacturers from Fiat to Ford—giving us access to Steve McQueen ’ s favorite car, a 1956 Jaguar XKSS; the 1971 DeTomaso Pantera that Elvis purchased for his then-girlfriend Linda Thompson (and which has two bullet holes in the steering wheel and one in

the driver ' s-side floorpan from when, after an altercation with Thompson, Presley fired three rounds into the interior when the car wouldn ' t start); and a super-rare, 24-karat-gold-plated 1980 DeLorean DMC-12, a model that was sold exclusively to American Express Gold Card members through the 1980 American Express catalog, for an astronomical \$85,000 (equivalent to more than \$250,000 today).

Exquisite photos of each car accompany each story, and since cars naturally hold more detail than watches, there will be more photos in this book—of the cars head-on, of their hood ornaments and wheels, and of course full-body shots. With Hranek ' s storytelling, the cars become more than just vehicles for transportation and status symbols; they represent pop-culture moments, pioneering achievements,

It was our great pleasure to host the 4th International Conference on Image and Video Retrieval (CIVR) at the National University of Singapore on 20–22 July 2005. CIVR aims to provide an international forum for the discussion of research challenges and exchange of ideas among researchers and practitioners in image/video retrieval technologies. It addresses innovative research in the broad field of image and video retrieval. A unique feature of this conference is the high level of participation by researchers from both academia and industry. Another unique feature of

CIVR this year was in its format – it offered both the traditional oral presentation sessions, as well as the short presentation cum poster sessions. The latter provided an informal alternative forum for animated discussions and exchanges of ideas among the participants. We are pleased to note that interest in CIVR has grown over the years. The number of submissions has steadily increased from 82 in 2002, to 119 in 2003, and 125 in 2004. This year, we received 128 submissions from the international communities: with 81 (63.3%) from Asia and Australia, 25 (19.5%) from Europe, and 22 (17.2%) from North America. After a rigorous review process, 20 papers were accepted for oral presentations, and 42 papers were accepted for poster presentations. In addition to the accepted submitted papers, the program also

included 4 invited papers, 1 keynote industrial paper, and 4 invited industrial papers. Altogether, we offered a diverse and interesting program, addressing the current interests and future trends in this area.
