Castaneda

This volume addresses controversies connected to the testing of the capacities and potentials of mediums. Today we commonly associate the term

Download File

PDF The Don

"medium" with the technical communication between transmitters and receivers. Yet this term likewise applies to those who cooperate with agencies that exceed the presumed domain of the material world. Insofar as

Download File

PDF The Don

Juan presumes a division between distinctly opposed categories of religion and the secular, technical media tend to be associated with the secular and human (trance) mediums tend to be associated with religion after 1900. This volume

Download File

PDF The Don

concerns the ways in which the term medium still marks an overlapping of – and thus problematizes – the aforementioned division between religion and the secular, the personal and the technological. The term medium carries with it a

Download File

PDF The Don

seed of doubt that  
is itself inseparable  
from investment in  
the medium's

power: insofar as  
they communicate  
with an "other"

realm, mediums  
offer the hope and  
promise of new  
possibilities and  
improved

efficiency, and thus  
of a better life; yet

Download File

PDF The Don

they have  
simultaneously  
been under  
suspicion of  
altering (or even  
inventing) the  
messages they  
communicate. It is  
due to this  
combination of  
promise and  
suspicion that  
"mediumism" has  
tended to evoke

Download File

PDF The Don

scientific, religious,  
and moral  
controversies.

Thus, we can speak  
of a "mediumistic  
trial" - that is, a  
process in which a  
medium is put to  
the test concerning  
its potentials and  
trustworthiness.

Around 1800,  
experts were asked  
if a modern secular

institution would be capable of inspiring, domesticating or excluding trance mediumship. This question has stayed with us ever since, and the answers have remained inconclusive. That is why the past and present of

Download File

mediumship may  
be asked to  
elucidate each  
other.
