Education is at a crossroads. While bureaucrats and teachers fight over the best way to structure and deliver education to students, much of the friction generated relates to the different conceptions of what education is about in the first place. The crisis in education is therefore of key importance and demands careful attention in order to formulate the best possible response. But before policies can be formulated, there needs to be a clear agreement on what education should be about. To this end, this collection of previously published essays facilitates just such discussion. The anthology is designed to give a snapshot of the seminal work in the philosophy of education and the input of ethical issues upon that work. It provides an authoritative tour of the profession and pivotal issues that confront it, written from a variety of international and critical perspectives.

This popular text features a rigorous yet practical approach to the difficult dilemmas that so often arise in school administration. Using case studies to illustrate particular ethical issues, the authors cover such topics as: standards • assessment and evaluation • equal opportunity • multiculturalism • religious differences • due process • freedom of expression • personal liberty • and authority. Updated to address today ' s emphasis on meeting standards and raising test scores, the Third Edition features: Cases that discuss such current issues as zero tolerance policies and integrity in reporting data. A revised chapter addressing the difficulty of focusing on standards while also dealing with competing demands, such as respecting the professional judgment of teachers, turning schools into learning communities, and engaging parents and members of the larger community in school life. Additional material that refocuses the discussion of legitimate authority and democracy on accountability and personal liberty. Praise for the First Edition! " This text has much to recommend [it] to educators in general and school administrators in particular....encourages inquiring educators to explore the complexity of their decisions, thus improving the likelihood that decisions will be more ethical.
