China - more than 6,000 in all." "But who was this powerful Emperor of the Qin Dynasty who needed such an army to guard him in the afterlife? How were the figures made? How could they have been manufactured on such a vast scale? Beautifully illustrated and based on the latest research, this little book provides a perfect introduction to what has often been described as the eighth Wonder of the World."--BOOK JACKET.

Unifier or destroyer, law-maker or tyrant? China's First Emperor (258-210 BC) has been the subject of debate for over 2,000 years. He gave us the name by which China is known in the West and, by his unification or elimination of six states, he created imperial China. He stressed the rule of law but suppressed all opposition, burning books and burying scholars alive. His military achievements are reflected in the astonishing terracotta soldiers—a veritable buried army—that surround his tomb, and his Great Wall still fascinates the world. Despite his achievements, however, the First Emperor has been vilified since his death. China's First Emperor and His Terracotta Warriors describes his life and times and reflects the historical arguments over the real founder of China and one of the most important men in Chinese history.

Warriors seeks to examine one of China's most famous archaeological discoveries in light of these new findings. The book begins with the discovery of the terracotta warriors and then tells the history of the Qin Dynasty and as much as is known about the construction of the third century BCE mausoleum, based on the work of the historian Sima Qian (145-90 BCE). He wrote that the First Emperor was buried with palaces, towers, officials, valuable artifacts, and wondrous objects. The new findings and the historical description of the mausoleum suggest that the next discoveries may surpass the size and conception of the original discovery of the terracotta warriors. In the second part, Edward Burman questions who built the warriors, how, and what purpose they served. Finally, he anticipates the ongoing discoveries and describes the new methods of excavation and preservation.
